James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational
Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi
experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to
understand what really works from developing interventions to validation studies of the intervention and then to efficacy
studies and the final scale up for large implementation of an intervention Moreover modeling student learning
developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or
absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and
inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these
methods are not yet common knowledge in the mathematics education community In fact currently there is no volume
devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it
directly discusses methodological issue in large scale studies and reports empirical data from large scale studies Modern

Methods of Teaching Mathematics Shalini Wadhwa, 2004 **Conceptual Maths** Peter Mattock, 2023-04-05 Written by Peter
Mattock Conceptual Maths Teaching about rather than just how to do mathematics in schools aims to empower teachers to
support students on a comprehensive and coherent journey through school mathematics Showcasing the best models
metaphors and representations it provides excellent examples explanations and exercises that can be used across the
curriculum Concepts are at the heart of the study of mathematics They are the ideas that remain constant whenever they are
encountered but which combine and build upon each other to create the mathematical universe It is the structure of each
concept that gives rise to the procedures that are used in calculation and problem solving and by learning about these
structures a learner can make sense of how different processes work and use them flexibly as need demands In his first book
Visible Maths Peter Mattock focused on the use of representations and manipulatives as images and tools and how this can
provide a window into some of these mathematical structures His aim in Conceptual Maths is to go deeper beyond the
procedures and to shed greater light on the structures of the subject's different concepts The book explores how a variety of
visual tools and techniques can be used in the classroom to deepen pupils understanding of mathematical structures

concepts and operations including number addition and subtraction multiplication and multiples division and factors proportionality functionality measures accuracy probability shape and transformation and vectors among many others In so doing Peter equips teachers with the confidence and practical know how to help learners assimilate knowledge of mathematical concepts into their schema and take their learning to the next level Containing numerous full colour diagrams and models to illustrate the conceptual takeaways and teaching techniques discussed Conceptual Mathsalso includes a glossary covering the key mathematical terms Suitable for teachers of maths in primary secondary and post 16 settings
