Matter Of The Facts:

The Matter of Facts Gareth Leng, Rhodri Ivor Leng, 2020-04-14 How biases the desire for a good narrative reliance on citation metrics and other problems undermine confidence in modern science Modern science is built on experimental evidence yet scientists are often very selective in deciding what evidence to use and tend to disagree about how to interpret it In The Matter of Facts Gareth and Rhodri Leng explore how scientists produce and use evidence They do so to contextualize an array of problems confronting modern science that have raised concerns about its reliability the widespread use of inappropriate statistical tests a shortage of replication studies and a bias in both publishing and citing positive results Before these problems can be addressed meaningfully the authors argue we must understand what makes science work and what leads it astray The myth of science is that scientists constantly challenge their own thinking But in reality all scientists are in the business of persuading other scientists of the importance of their own ideas and they do so by combining reason with rhetoric Often they look for evidence that will support their ideas not for evidence that might contradict them often they present evidence in a way that makes it appear to be supportive and often they ignore inconvenient evidence In a series of essays focusing on controversies disputes and discoveries the authors vividly portray science as a human activity driven by passion as well as by reason By analyzing the fluidity of scientific concepts and the dynamic and unpredictable development of scientific fields the authors paint a picture of modern science and the pressures it faces

A Matter of Facts Laura A. Millar, 2021-03-04 The safeguarding of authentic facts is essential especially in this disruptive Orwellian age where digital technologies have opened the door to a post truth world in which alternative facts can be so easily accepted as valid And because facts matter evidence matters In this urgent manifesto archives luminary Millar makes the case that authentic and accurate records archives data and other sources of documentary proof are crucial in supporting and fostering a society that is respectful democratic and self aware An eye opening treatise for the general public an invaluable resource for archives students and a provocative call to arms for information and records professionals Millar s book explains the concept of evidence and discusses the ways in which records archives and data are not just useful tools for our daily existence but also essential sources of evidence both today and in the future includes plentiful examples that illustrate the critical role evidence plays in upholding rights enforcing responsibilities tracing family or community stories and capturing and sharing memories and examines the impact of digital technologies on how records and information are created and used With documentary examples ranging from Mesopotamian clay tablets to World War II photographs to today s Twitter messages and Facebook posts Millar s stirring book will encourage readers to understand more fully the importance of their own records and archives for themselves and for future generations

Do Facts Matter? Jennifer L. Hochschild, Katherine Levine Einstein, 2015-01-20 A democracy falters when most of its citizens are uninformed or misinformed when misinformation affects political decisions and actions or when political actors foment misinformation the state of affairs the United States faces today as this timely

book makes painfully clear In *Do Facts Matter* Jennifer L. Hochschild and Katherine Levine Einstein start with Thomas Jefferson's ideal citizen who knows and uses correct information to make policy or political choices What then the authors ask are the consequences if citizens are informed but do not act on their knowledge More serious what if they do act but on incorrect information Analyzing the use, nonuse and misuse of facts in various cases such as the call to impeach Bill Clinton the response to global warming Clarence Thomas's appointment to the Supreme Court the case for invading Iraq beliefs about Barack Obama's birthplace and religion and the Affordable Care Act Hochschild and Einstein argue persuasively that errors of commission that is acting on falsehoods are even more troublesome than errors of omission While citizens inability or unwillingness to use the facts they know in their political decision making may be frustrating their acquisition and use of incorrect knowledge pose a far greater threat to a democratic political system *Do Facts Matter* looks beyond individual citizens to the role that political elites play in informing, misinforming and encouraging or discouraging the use of accurate or mistaken information or beliefs Hochschild and Einstein show that if a well informed electorate remains a crucial component of a successful democracy the deliberate concealment of political facts poses its greatest threat **Facts Don't Matter**

Dixie Burkhart, 2008-11-20 In order to reach the outcome she wanted the facts were ignored and she refused to rule on laws that were violated Under the guise of judicial discretion the judge's erroneous opinion was nothing less than court assisted business fraud When we allow our judges to ignore the facts in evidence and the law to make rulings by opinion it opens the door for political favor and judicial corruption When a judge's opinion defies common sense and the law one can only wonder what motivated that opinion *Problems of Mind and Matter* John Wisdom, 1970 Professor Wisdom gives an elementary introduction to the applications in philosophy of the analytical method He believes that the aim of analysis is clarity whereas the aim of speculative philosophy is truth After a brief introduction on what analysis is he discusses the relation of body and mind and seeks for causal relations between mental and material events He concludes this section with a chapter on Free will before turning to perception and the external world *Law and the Order of Culture* Robert Post, 1991-01-01

Law and the Order of Culture is an outstanding collection of essays that explores the cultural creation of legal meaning addressing interpretive processes within the law as well as the social constitution of legal doctrine Originally published in *Representations* these essays are at the center of the law and literature movement which exemplifies a burgeoning literature in feminist jurisprudence critical legal studies and other work that has focused on law as evidence of cultural orderings For this edition Robert Post has written a new introduction proposing an analytic framework for this literature and discussion of the seven essays contained within the book Ranging over a variety of interdisciplinary perspectives the contributors to the volume address such central issues as the construction of legal normativity interpretive theory and practice in constitutional law the function of legal metaphors the interpretive foundations of the law fact distinction and the role of politics in contemporary critical legal studies *Law and the Order of Culture* will attract a broad and eclectic readership across many

Mind Out of Matter G.R. Mulhauser, 2012-12-06 Mind Out of Matter aims to transform the way we think about consciousness and the physical world Unlike many contemporary volumes it develops a robust and philosophically satisfying account of the mind body relationship without doing violence to fundamental physics It expunges popular but ludicrous assumptions about the in principle capabilities of cognizers and with the help of tools from mathematics and scientific fields supplants flawed notions of representation function and mental state with objective and physically grounded alternatives It debunks quantum theories of consciousness constructs a simple zombie recipe and evaluates recent research on chaotic analogue networks This book is indispensable for readers in philosophy of mind cognitive science and artificial intelligence and for mathematicians applying complexity theory or information theory to biological cognition Audience General academic university libraries plus university departmental libraries in philosophy artificial intelligence cognitive science and computer science Researchers and specialists in philosophy of mind cognitive science artificial intelligence artificial life complexity theory and information theory Researchers in the telecommunications industry

The Matter of Consciousness Torin Andrew Alter, 2023 Torin Alter makes a compelling case against the view that consciousness is a physical phenomenon He argues that Frank Jackson's knowledge argument refutes all standard versions of physicalism and leads to Russellian monism the view there are intrinsic properties which both constitute consciousness and underlie properties described by physics
