The Medieval Heritage in Early Modern Metaphysics and Modal Theory, 1400-1700 R.L. Friedman, L.O. Nielsen, 2013-04-17 On the most basic level the articles brought together in the present volume aim to contribute to the charting of the often subtle links between the medieval and early modern periods in the fields of metaphysics philosophical

theology and modal theory In selecting this line of inquiry the volume is consciously intended to offer support for the stance that in the higher or speculative sciences no sharp divide exists between the later Middle Ages on the one hand and the Renaissance and early modern period on the other In adopting such an approach one emphasizing historical continuity instead of discontinuity the volume can be seen as challenging at least two related sets of convictions concerning the intellectual life of the period 1400 1700 First prominent Renaissance and early modern thinkers portrayed their own intellectual projects and accomplishments as radical breaks with the scholasticism characteristic of the Middle Ages and also dominant in their own time the volume to no small extent takes as its point of departure a reluctance or at least a hesitation to accept these bold claims Second a large part of nineteenth and twentieth century historiography has taken the Renaissance and early modern claims of fundamental innovation at face value in emphasizing the continuity that exists between the thought of the medieval and of the early modern periods the volume is part of an attempt to offer a more balanced view of the intellectual production of the later period *Zygmunt Bauman Textbook* Tony Blackshaw,2005 This timely book provides the definitive concise introduction to Zygmunt Bauman A well written text it assumes no prior knowledge of his work and will appeal to those wishing to explore the ideas of one of the world s most wide ranging thinkers
