Naturalists, Explorers, & Pioneers Alton Anthony Lindsey, 1980

The Great Naturalists Robert Huxley, 2019-09-24

The story of natural history as seen through the lives observations and discoveries of the world's greatest naturalists We owe a debt of gratitude to the naturalists who described experimented collected and gave us the means to understand the natural world They came from all over the globe from classical times to the end of the nineteenth century when natural history changed from a mainly amateur pursuit to today's specialized scientific profession Braving dangers including storms pirates and disease in pursuit of cataloging the natural world pioneers such as Alexander von Humboldt and Charles Darwin changed the course of science with their groundbreaking theories This book includes many naturalists who are well known such as the earliest great natural historian Aristotle Carl Linnaeus the man who brought order to nature the ornithologist and painter John James Audubon and Georges Cuvier who established the concept of extinction Others are now given their rightful place Antony van Leeuwenhoek who made his own microscopes and discovered bacteria and Mary Anning the princess of paleontology who had an amazing self-taught talent for finding fossils Many of these people were great artists as well as scientists and *The Great Naturalists* is illustrated with a selection of beautiful and precise paintings and drawings of birds animals fossils fish shells and rocks from the unparalleled collections of the Natural History Museum London

Naturalists of the Frontier [Second Edition] Dr. Samuel Wood Geiser, 2018-03-12 This acclaimed study of the history of scientific exploration in the Southwest from renowned biologist Dr Samuel Wood Geiser first published in its present revised edition in 1948 would be of interest to many types of readers For those who love stories of adventure and struggle it narrates the lives and varying fates of men who lived under strange and difficult conditions and who met those conditions some with heroic resolution and resourcefulness some with fainting and failure many with a mixture of both These lives are presented not in the style of the popular semi-fiction of the day but with such accuracy as only a thorough study of many sorts of records makes possible yet too with sympathy and insight into human nature throughout For those interested in frontier life and frontier stories this book presents an unwonted aspect of that life the struggle for culture and for science under frontier conditions a struggle no less heroic than that of the fighting pioneer *Naturalists of the Frontier* realistically portrays the hard material conditions of frontier life yet these are illumined by the ideals of the men who subdued those conditions The student of the early history of the Southwest and particularly of Texas will find here presented unusual and significant aspects of that history For the historian of science this book pictures the beginnings of science in a new country it shows what science must be under frontier conditions an examination of the resources of the region rather than a study of underlying problems

Montana's Pioneer Naturalist George M. Dennison, 2016-09-21 A naturalist on Montana's academic frontier passionate conservationist Morton J Elrod was instrumental in establishing the Department of Biology at the University of Montana as well as Glacier National Park and the National Bison Range In *Montana's Pioneer Naturalist* the first in-depth assessment of

Elrod's career George M Dennison reveals how one man helped to shape the scholarly study of nature and its institutionalization in the West at the turn of the century Elrod moved to Missoula in 1897 just four years after the state university's founding and participated in virtually every aspect of university life for almost forty years To reveal the depths of this pioneer scientist's influence on the growth of his university his state and the academic fields he worked in author George M Dennison delves into state and university archives including Elrod's personal papers Although Elrod was an active participant in bison conservation and the growth of the National Park Naturalist Service much of his work focused on Flathead Lake where he surveyed local life forms and initiated the university's biological station one of the first of its kind in the United States Yet at heart Elrod was an educator who desired to foster in his students a love of nature which he said should give health to any one and supply knowledge of greatest value either to the individual or to society or to both In this biography of a prominent scientist now almost forgotten Dennison longtime president of the University of Montana demonstrates how Elrod's scholarship and philosophy regarding science and nature made him one of Montana's most distinguished naturalists conservationists and educators
