Methods and Tools for Co-operative and Integrated Design Serge Tichkiewitch, Daniel Brissaud, 2013-03-14 SMC COLOMBIER FONTAINE is a company in the AFE METAL group which uses a sand casting process to manufacture steel primary parts To reduce the time to market primary part producers need to reduce the time and cost of the industrialisation process These factors in addition to the global goal of improving process performance levels brought SMC to develop numerical technologies and traceability from quotation to part delivery 1 Nowadays these improvements are incorporated into company culture The next step in reducing the time and cost of the production process is to introduce a complete methodology of use and experience feedback of these new models and methods To be able to generalise this approach a CAD methodology is essential and thus becomes a step in the industrialisation process The amount of improvements engendered by the numerical technologies largely justifies the time investment made to obtain a numerical definition of all the different elements in the sand casting process 2 The objective of our approach is to optimise the product and its production process by generating a complete numerical reference through the integration of quotation CAD simulation new manufacturing technologies and effective production processes

Dynamic Modelling of Information Systems K.M. van Hee, H.G. Sol, 2014-06-28 The use of dynamic models in the development of information systems is regarded by many researchers as a promising issue in design support Modelling the dynamics of information systems is likely to improve the quality and the performance of the design products Dynamic modelling as a new approach for dynamic

and National Courts and the (De-)Fragmentation of International Law Ole Kristian Fauchald, André Nollkaemper, 2014-10-01 In recent decades there has been a considerable growth in the activities of international tribunals and the establishment of new tribunals Furthermore supervisory bodies established to control compliance with treaty obligations have adopted decisions in an increasing number of cases National courts further add to the practice of adjudication of claims based on international law While this increasing practice of courts and supervisory bodies strengthens the adjudicatory process in international law it also poses challenges to the unity of international law Most of these courts operate within their own special regime functional regional or national and will primarily interpret and apply international

law within the framework of that particular regime The role of domestic courts poses special challenges as the powers of such courts to give effect to international law as well as their actual practice in applying such law largely will be determined by national law At the same time both international and national courts have recognised that they do not operate in isolation from the larger international legal system and have found various ways to counteract the process of fragmentation that may result from their jurisdictional limitations This book explores how international and national courts can and do mitigate fragmentation of international law It contains case studies from international regimes including the WTO the IMF investment arbitration and the ECtHR and from various national jurisdictions including Japan Norway Switzerland and the UK providing a basis for conclusions to be drawn in the final chapter

The Interpretation and Application of the European Convention of Human Rights Malgosia Fitzmaurice, Panos Merkouris, 2012-11-30 In *The Interpretation and Application of the European Convention of Human Rights Legal and Practical Implications* the aim is to offer a two pronged approach on the effect that the ECHR has in the field of human rights as well as in other areas of international law The first part explores general and theoretical aspects of the application of the ECHR such as provisional application norm conflict resolution the interplay between human rights and occupation law The second Part building on the research and conclusions of the first Part examines the amphibious relationship of the ECHR with other areas of law Since no branch of international law exists in clinical isolation this Part analyses the effects that the ECHR has on and is recipient of from a variety of diverse areas of law such as law of the sea investment law and rights of indigenous peoples

The Principle of Systemic Integration in International Law Campbell McLachlan KC, 2024-06-24. International law has greatly expanded in reach and density over the past few decades, and its fragmented and decentralized nature is causing anxiety among those who need to resolve legal dilemmas in a system that lacks vertical hierarchy. Although the principle of systemic integration is embodied in Article 31(3)(c) of the Vienna Convention 1969, its operation and significance has not been fully assessed. *The Principle of Systemic Integration in International Law* fills this research gap by analysing the manner in which the principle has been applied in the judicial decisions of international courts and tribunals together with the practice of states and international organizations in the framing of international instruments and their application. Building upon the framework he first pioneered in 2005 and the culmination of two decades of academic research and practical experience in international law, the author Campbell McLachlan KC closely examines legislative texts and cases to reflect on the principle's theoretical foundations and actual application in practice. The book argues that the principle of systemic integration contributes to an orderly framework within which conflicts between institutions and between legal norms may be addressed. It explores how disparate parts of international law are integrated in the development of bilateral and multilateral treaties and finally analyses the operation of the principle in international courts and tribunals. The reasoning and larger questions presented by the book will bring fresh insights to researchers and practitioners undertaking any international law project.
