Ackerman, 1977 **Principles of Architectural History** Paul Frankl, 1914 Principles of Art History Heinrich Wölfflin, 2015-05-07 Principles of Art History by Heinrich Wölfflin 1864 1945 a revolutionary attempt to construct a science of art through the study of the development of style has been a foundational work of formalist art history since it was first published in 1915 At once systematic and subjective and remarkable for its compelling descriptions of works of art Wölfflin's text has endured as an accessible yet rigorous approach to the study of style Although Wölfflin applied his analysis to objects of early modern European art Principles of Art History has been a fixture in the theoretical and methodological debates of the discipline of art history and has found a global audience With translations in twenty four languages and many reprints Wölfflin's work may be the most widely read and translated book of art history ever This new English translation appearing one hundred years after the original publication returns readers to Wölfflin's 1915 text and images It also includes the first English translations of the prefaces and afterword that Wölfflin himself added to later editions Introductory essays provide a historical and critical framework referencing debates engendered by Principles in the twentieth century for a renewed reading of the text in the twenty first *What is Architectural History?* Andrew Leach, 2013-05-03 What is Architectural History considers the questions and problems posed by architectural historians since the rise of the discipline in the late nineteenth century How do historians of architecture organise past time and relate it to the present How does historical evidence translate into historical narrative Should architectural history be useful for practicing architects If so how Leach treats the disciplinarity of architectural history as an open question moving between three key approaches to historical knowledge of architecture within art history as an historical specialisation and most prominently within architecture He suggests that the confusions around this question have been productive ensuring a rich variety of approaches to the project of exploring architecture historically Read alongside introductory surveys of western and global architectural history this book will open up questions of perspective frame and intent for students of architecture art history and history Graduate students and established architectural historians will find much in this book to fuel discussions over the current state of the field in which they work Principles of Architectural History Paul Frankl, 1968 *Writing Architectural History* Aggregate Architectural History Collaborative, 2021-12-14 Over the past two decades scholarship in architectural history has transformed moving away from design studio pedagogy and postmodern historicism to draw instead from trends in critical theory focusing on gender race the environment and more recently global history connecting to revisionist trends in other fields With examples across space and time from medieval European coin trials and eighteenth century Haitian revolutionary buildings to Weimar German construction firms and present day African refugee camps Writing Architectural History considers the impact of these shifting institutional landscapes and disciplinary positionings for

Principles of architectural history Paul Frankl,1973 **The Architecture of Art History** Mark Crinson,Richard J. Williams,2018-12-13 What is the place of architecture in the history of art Why has it been at times central to the discipline and at other times seemingly so marginal What is its place now Many disciplines have a stake in the history of architecture sociology anthropology human geography to name a few This book deals with perhaps the most influential tradition of all art history examining how the relation between the disciplines of art history and architectural history has waxed and waned over the last one hundred and fifty years In this highly original study Mark Crinson and Richard J Williams point to a decline in the importance attributed to the role of architecture in art history over the last century which has happened without crisis or self reflection The book explores the problem in relation to key art historical approaches from formalism to feminism to the social history of art and in key institutions from the Museum of Modern Art to the journal October Among the key thinkers explored are Banham Baxandall Giedion Panofsky Pevsner Pollock Riegl Rowe Steinberg Wittkower and W lfflin The book will provoke debate on the historiography and present state of the discipline of art history and it makes a powerful case for the reconsideration of architecture

The Baroque in Architectural Culture, 1880-1980 Andrew Leach,John Macarthur,2016-03-09 In his landmark volume Space Time and Architecture Sigfried Giedion paired images of two iconic spirals Tatlin s Monument to the Third International and Borromini s dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern

architectural culture **Art History and Its Institutions** Elizabeth Mansfield, 2005-08-18 Art History and Its Institutions focuses on the institutional discourses that shaped and continue to shape the field from its foundations in the nineteenth century From museums and universities to law courts labour organizations and photography studios contributors examine a range of institutions considering their impact on movements such as modernism their role in conveying or denying legitimacy and their impact on defining the parameters of the discipline **Robert Willis (1800-1875) and the Foundation of Architectural History** Alexandrina Buchanan, 2013 The first full scale biography of Robert Willis the founding father of architectural history Architectural Principles in the Age of Humanism Rudolf Wittkower, 1971 Sir Kenneth Clark wrote in the Architectural Review that the first result of this book was to dispose once and for all of the hedonist or purely aesthetic theory of Renaissance architecture and this defines Wittkower's intention in a nutshell **On the Methodology of Architectural History** Demetri Porphyrios, 1981 **The Expressionist Turn in Art History** Kimberly A. Smith, 2017-07-05 During the period in which Expressionist artists were active in central Europe art historians were producing texts which also began to be characterized evocatively as expressionist yet the notion of an expressionist art history has yet to be fully explored in historiographic studies of the discipline This anthology offers a cross section of noteworthy art history texts that have been described as expressionist along with critical commentaries by an international group of scholars Written between 1912 and 1933 the primary sources have been selected from the published scholarship of both recognized and less familiar figures in the field's Germanic tradition Wilhelm Worringer Fritz Burger Ernst Heidrich Max Dvor Heinrich Wölfflin and Carl Einstein Translated here for the first time these examples of an expressionist turn in art history along with their secondary analyses and the book's introduction offer a productive lens through which to re-examine the practice and theory of art history in the early twentieth century *History of Architectural Theory* Hanno-Walter Kruft, 1994 As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to the present this book is an essential resource for architects students teachers historians and theorists Using only original sources Kruft has undertaken the monumental task of researching organizing and analyzing the significant statements put forth by architectural theorists over the last two thousand years The result is a text that is authoritative and complete easy to read without being reductive *Architectural Aesthetic Speculations* Jasper Michael, 2016-11-01 Architectural Aesthetic Speculations expands our understanding of the role of formal aesthetic criteria in twentieth century artistic practices and reveals potentially transformative aspects in the art of architectural composition The book stages an encounter of philosopher Gilles Deleuze's 1925 1995 constructivist sensibility and architect Louis Kahn's 1901 1974 mode of architectural figuration This book is of interest to architects artists historians and theorists and to those wishing to learn about contemporary aesthetic practice and theory **Architectural Principles in the Age of Historicism** Robert Jan van Pelt, Robert Jan Pelt, Carroll William Westfall, 1991-01-01 Explores the relationship between architectural history and the current practice of architecture The
