

The Elements of Design

(the tools to make art)

Line		Horizontal, vertical, diagonal Straight, curved, dotted, broken Thick, thin
Shape		2D (two dimensionally)/ flat Geometric (square, circle, oval, triangle) Organic (all other shapes)
Form		3D (three dimensional) Geometric (cube, sphere, cone) Organic (all other forms such as: people, animals, tables, chairs, etc)
Colour		Relates to the wavelengths of light Relates to hue (name), value (lightness/darkness), intensity/saturation, or amount of pigment, and temperature (warm and cool) Relates to tint, tone and shade
Texture		The feel, appearance, thickness, or stickiness of a surface (for example: smooth, rough, silky, furry)
Space		The area around, within, or between images or parts of an image Relates to perspective Positive and negative space
Value		The darkness or lightness of a color. White added to a color makes it a tint. Black added to a color makes it a shade.

The Principles of Design

(how to use the tools to make art)

Pattern		A regular arrangement of alternated or repeated elements (shapes, lines, colours) or motifs.
Contrast		The juxtaposition of different elements of design (for example: rough and smooth textures, dark and light values) in order to highlight their differences and/or create visual interest, or a focal point.
Emphasis		Special attention/ importance given to one part of a work of art (for example, a dark shape in a light composition). Emphasis can be achieved through placement, contrast, colour, size, repetition... Relates to focal point.
Balance		A feeling of balance results when the elements of design are arranged symmetrically or asymmetrically to create the impression of equality in weight or importance.
Proportion/ Scale		The relationship between objects with respect to size, number, and so on, including the relation between parts of a whole.
Harmony		The arrangement of elements to give the viewer the feeling that all the parts of the piece form a coherent whole.
Rhythm/ Movement		The use of recurring elements to direct the movement of the eye through the artwork. There are five kinds of rhythm: random, regular, alternating, progressive, and flowing. The way the elements are repeated is used to lead the eye to the focal area. Movement can be directed (for example, along edges and by means of shape and colour).

Principles Of Element Design

Ernest Allen Batchelder

Principles Of Element Design:

Principles of Element Design Peter Rich, Yvonne Dean, 2012-10-02 The construction of buildings is learnt through experience and the inheritance of a tradition in forming buildings over several thousand years Successful construction learns from this experience which becomes embodied in principles of application Though materials and techniques change various elements have to perform the same function Principles of Element Design identifies all the relevant elements and then breaks these elements down into all their basic constituents making it possible for students to fully understand the given theory and principles behind each part As all building projects are subject to guidance through the Building Regulations and British Standards this book gives an immediate reference back to relevant information to help practitioners and contractors identify key documents needed Yvonne Dean B A Hons B A Open RIBA an architect energy consultant and materials technologist She also has 15 years experience as a lecturer travels widely and is a guest lecturer at many universities She pioneered an access course for Women into Architecture and Building which has been used as a template by others and has been instrumental in helping to change the teaching of technology for architects and designers Peter Rich AA Dipl Hons Architect started his career with 14 years experience as a qualified architectural technician He then joined the AA School of Architecture working with Bill Allen and John Bickerdike after his graduation later becoming a partner of Bickerdike Allen Rich and Partners He also taught building construction at the Bartlett School of Architecture University College London and architectural design at the Polytechnic of North London He now acts as a Consultant

An Illustrated Field Guide to the Elements and Principles of Art + Design Joshua Field, 2018 Discover the hidden language of images using this full color guide to the Elements and Principles of Art and Design with over 200 individual illustrations and 30 artwork examples This comprehensive illustrated exploration of how images are composed is organized for easy reference and explores each element and principle in depth Unlike big textbooks this field guide sized edition can easily slip into a bag or pocket for your next trip to the museum design meeting or classroom critique

Principles of Element Design Peter Maurice Rich, 1974
