

Stinger Variation #1

This is a design that one of my cellies mass-produced. He could assemble one in about an hour, using parts cannibalized from a couple of double-blade safety razors, a soft tumbler plastic lid, and double insulated wire from an earphone plug.

I'm told that four- to six-blade stingers can be made, though I've never seen any. I'm dubious because of the insulation problems involved.

Warning: Never plug in the stinger unless the blades are in the water, and never remove the stinger from the water while it's plugged in, or it could blow up!

Stinger Variation #2

An interesting stinger design by one of my cellies. Simple and streamlined in appearance but awkward to use, since without the play offered by a flexible wire, it is necessary to hand-hold the tumbler of water while it heats.

Caution: Unplug the unit before removing it from the water.

Deviant Design Craig Martin,2022-07-14 Craig Martin addresses the transgressive or deviant aspects of design design that straddles the divide between the licit and illicit the legal and illegal in a variety of ways Martin argues that design is not necessarily for the social good but that it is immersed in the social realm in all its contradictions and confusions Through a series of case studies he explores a wide range of social practices that employ illicit forms of design thinking including early computer hacking and present day hacker culture in which everyday objects are repurposed and deliberately misused the cultures of reproduction counterfeit and pirated versions of classic and luxury designs and the use of material practices by smugglers to conceal drugs within consumer goods and luggage Deviant Design contends that these amateur and illicit practices challenge the normative idea of the professional designer or maker Rather than being reliant on the services of institutionalized design professionals the adhocist practitioner displays forms of innovative design knowledge in understanding how artefacts have an inherent potential to be misused or repurposed

Dark Matter Gregory Sholette, 2010-11-05 Art is big business with some artists able to command huge sums of money for their works while the vast majority are ignored or dismissed by critics This book shows that these marginalised artists the dark matter of the art world are essential to the survival of the mainstream and that they frequently organize in opposition to it Gregory Sholette a politically engaged artist argues that imagination and creativity in the art world originate thrive in the non commercial sector shut off from prestigious galleries and champagne receptions This broader creative culture feeds the mainstream with new forms and styles that can be commodified and used to sustain the few artists admitted into the elite This dependency and the advent of inexpensive communication audio and video technology has allowed this dark matter of the alternative art world to increasingly subvert the mainstream and intervene politically as both new and old forms of non capitalist public art This book is essential for anyone interested in interventionist art collectivism and the political economy of the art world

Art and Tradition in a Time of Uprisings Gabriel Levine, 2020-03-24 Examining radical reinventions of traditional practices ranging from a queer reclamation of the Jewish festival of Purim to an Indigenous remixing of musical traditions Supposedly outmoded modes of doing and making from music and religious rituals to crafting and cooking are flourishing both artistically and politically in the digital age In this book Gabriel Levine examines collective projects that reclaim and reinvent tradition in contemporary North America both within and beyond the frames of art Levine argues that in a time of political reaction and mass uprisings the subversion of the traditional is galvanizing artists activists musicians and people in everyday life He shows that this takes place in strikingly different ways for Indigenous and non Indigenous people in settler colonies Paradoxically experimenting with practices that have been abandoned or suppressed can offer powerful resources for creation and struggle in the present Levine shows that in projects that span the discontinuum of tradition strange encounters take place across the lines of class

Indigeneity race and generations These encounters spark alliance and appropriation desire and misunderstanding creative mis translation and radical revisionism He describes the yearly Purim Extravaganza which gathers queer leftist and Yiddishist New Yorkers in a profane reappropriation of the springtime Jewish festival the Ottawa based Indigenous DJ collective A Tribe Called Red who combine traditional powwow drumming and singing with electronic dance music and the revival of home fermentation practices considering it from microbiological philosophical aesthetic and political angles Projects that take back the vernacular in this way Levine argues not only develop innovative forms of practice for a time of uprisings they can also work toward collectively reclaiming remaking and repairing a damaged world **Mediating**

How prisoners serve as media laborers while the prison serves as a testing ground for new media technologies Prisons are not typically known for cutting edge media technologies Yet from photography in the nineteenth century to AI enhanced tracking cameras today there is a long history of prisons being used as a testing ground for technologies that are later adopted by the general public If we recognize the prison as a central site for the development of media technologies how might that change our understanding of both media systems and carceral systems *Prison Media* foregrounds the ways in which the prison is a model space for the control and transmission of information a place where media is produced and a medium in its own right Examining the relationship between media and prison architecture as surveillance and communication technologies are literally built into the facilities this study also considers the ways in which prisoners themselves often do hard labor as media workers labor that contributes in direct and indirect ways to the latest technologies developed and sold by multinational corporations like Amazon There is a fine line between ankle monitors and Fitbits and *Prison Media* helps us make sense of today s carceral society **A Silent Profession** Arthur Allen, 2020-03-20 If the words beautiful prison are hard to say does that explain why

architects seldom if ever talk or write about the artistic merits and functional failures of asylum and prison design In an attempt to understand this silence and the absence of asylums and prisons in competitions seeking honors for excellence in design the papers in this book examine what may be architects most difficult field of work In North America architects are required by law to design institutional buildings but with political change their clients often change their minds demanding civilized or brutal confinement in turn When brutality or indifferent treatment is required that aggravates crime or madness to do the work an architect must defy his her code of ethics which demands service in the public interest Architects are not alone with this quandary This book concludes that resolution of this discussion requires that when a client and an architect know the intentions and consequences of a buildings design and operations they must share the moral and functional responsibilities of the work
