The New Public Service Paul C. Light, 2001-09-19

According to Paul C Light s controversial new book *The New Public Service* this January s 4 8 percent federal pay increase will do little to compensate for what potential employees think is currently missing from federal careers Talented Americans are not saying show me the money but show me the job And federal jobs just do not show well All job offers being equal Light argues that the pay increase would matter But all offers are not equal Light s research on what graduates of the top public policy and administration graduate programs want indicates that the federal government is usually so far behind its private and nonprofit competitors that pay never comes into play Light argues that the federal government is losing the talent war on three fronts First its hiring system for recruiting talent top to bottom underwhelms at almost every task it undertakes Second its annual performance appraisal system is so inflated that federal employees are not only all above average they are well on their way to outstanding Third and most importantly the federal government is so clogged with needless layers and convoluted career paths that it cannot deliver the kind of challenging work that talented Americans expect None of these problems would matter Light argues if the government centered public service was still looking for work Unfortunately as Light s book demonstrates federal careers were designed for a workforce that has not punched since the 1960s and certainly not for one that grew up in an era of corporate downsizing and mergers The government centered public service is mostly a thing of the past replaced by a multisectoral public service in which employees switch jobs and sectors with ease Light concludes his book by offering the federal government a simple choice It can either ignore the new public service and troll further and further down the class lists for new recruits while hoping that a tiny pay in

Strategic Management in Public Services Organizations Ewan Ferlie, Edoardo Ongaro, 2015-02-20 Strategic Management in Public Services Organizations sets out to connect the two traditionally disparate academic literatures of public management and strategic management The authors argue that some models of strategic management are now of enhanced relevance for contemporary public services organizations especially when considering successive New Public Management reforms This observation has important consequences for the requisite work practices skills and knowledge bases of current public managers as they are increasingly being asked to act as strategic as well as operational managers Strategic Management in Public Services Organizations takes a strongly comparative and international perspective in addressing the fundamental issue of strategic management within diverse public administrative traditions The impact of strategic management on the performance of public agencies is examined and it is argued that the appropriate use of strategic management models depends on the politico administrative and cultural contexts of the public services organization in question concluding that there is no single best way to strategically lead public organisations This is an advanced textbook aimed at the postgraduate level particularly students on MPAs and MBAs with a public sector option or MScs in Public Policy and Public Management
