Shooting Blanks War Making That Doesn't Work:

Shooting Blanks James F. Dunnigan, Albert A. Nofi, 1991 Shooting blanks is what happens when the troops are called out and the results are not what was expected The authors distinguished defense analysts look closely at all aspects of war making from officer training and weapons procurement to intelligence gathering and the relationship between bullets and ballots and deliver a startling timely clarion call that concerned citizens can't afford to ignore **Professional Journal of the United States Army**, 1992 **Critical Reflections on Security and Change** Stuart Croft, Terry Terriff, 2013-02-01 The contributors reflect critically on security studies since the 1980s They conclude that analysts and policy makers have not been able to respond well to the changes that have occurred and that they must revise their approach if they are to meet the challenges of the future *Military Review*, 1992 *Parameters*, 1995 **Breaking the Phalanx** Douglas A. Macgregor, 1997-01-30 This work proposes the reorganization of America's ground forces on the strategic operational and tactical levels Central to the proposal is the simple thesis that the U S Army must take control of its future by exploiting the emerging revolution in military affairs The analysis argues that a new Army warfighting organization will not only be more deployable and effective in Joint operations reorganized information age ground forces will be significantly less expensive to operate maintain and modernize than the Army's current Cold War division based organizations And while ground forces must be equipped with the newest weapons new technology will not fulfill its promise of shaping the battlefield to American advantage if new devices are merely grafted on to old organizations that are not specifically designed to exploit them It is not enough to rely on the infusion of new expensive technology into the American defense establishment to preserve America's strategic dominance in the next century The work makes it clear that planes ships and missiles cannot do the job of defending America's global security issues alone The United States must opt for reform and reorganization of the nation's ground forces and avoid repeating Britain's historic mistake of always fielding an effective army just in time to avoid defeat but too late to deter an aggressor **Air Force Magazine**, 1991-07 [Quarterly Review of Military Literature](#), 1992 **Army**, 1994 *Infantry*, 1996
