Lower K And L Theory:

Lower K- and L-theory Andrew Ranicki, 1992-05-21 This is the first unified treatment in book form of the lower K groups of Bass and the lower L groups of the author Low Dimensional Topology and Number Theory Masanori Morishita, Hiroaki Nakamura, Jun Ueki, 2025-03-02 This book is the result of research initiatives formed during the workshop Low Dimensional Topology and Number Theory XIII at Kyushu University in 2022 It is also dedicated to the memory of Professor Toshie Takata who has been a main figure of the session chairs for the series of annual workshops since 2009 The activity was aimed at understanding and deepening recent developments of lively and fruitful interactions between low dimensional topology and number theory over the past decades In this volume of proceedings the reader will find research papers as well as survey articles including open problems at the interface between classical and quantum topology and algebraic and analytic number theory written by leading experts and active researchers in the respective fields Topics include among others the strong slope conjecture Kashiwara Vergne Lie algebra braids and fibered double branched covers of 3 manifolds Temperley Lieb Jones category and conformal blocks WRT invariants and false theta functions the colored Jones polynomial of the figure eight knot potential functions and A polynomials l adic Galois polylogarithms Dijkgraaf Witten invariants in Bloch groups analogies between knots and primes in arithmetic topology normalized Jones polynomials for rational links Iwasawa main conjecture Weber's class number problem The book provides a valuable resource for researchers and graduate students interested in topics related to both low dimensional topology and number theory **The theory of functions of a real variable and the theory of** Ernest William Hobson, 1927 The Theory of Functions of a Real Variable and the Theory of Fourier's Series Ernest William Hobson, 1927 **The Theory of Functions of a Real Variable and the Theory of Fourier's Series** Ernest William Hobson, 1921 Quantum Theory and Symmetries with Lie Theory and Its Applications in Physics Volume 2 Vladimir Dobrev, 2018-09-30 This book is the second volume of the proceedings of the joint conference X International Symposium Quantum Theory and Symmetries QTS X and XII International Workshop Lie Theory and Its Applications in Physics LT XII 19-25 June 2017 Varna Bulgaria The QTS series started around the core concept that symmetries underlie all descriptions of quantum systems It has since evolved into a symposium on the frontiers of theoretical and mathematical physics The LT series covers the whole field of Lie Theory in its widest sense together with its applications in many facets of physics As an interface between mathematics and physics the workshop serves as a meeting place for mathematicians and theoretical and mathematical physicists In the division of the material between the two volumes the Editor has tried to select for the first and second volumes papers that are more oriented toward mathematics and physics respectively However this division is relative since many papers could have been placed in either volume The topics covered in this volume represent the most modern trends in the fields of the joint conferences symmetries in string theories conformal field theory holography gravity theories and cosmology gauge theories foundations of quantum theory nonrelativistic and classical theories

Chew-theory Approach to the Scattering of Low Energy K⁺ Particles by Nucleons Henry P. Stapp, 1956

Multi-Hamiltonian Theory of Dynamical Systems Maciej Blaszk, 2012-12-06 A modern Hamiltonian theory offering a unified treatment of all types of systems i.e. finite lattice and field is presented Particular attention is paid to nonlinear systems that have more than one Hamiltonian formulation in a single coordinate system As this property is closely related to integrability this book presents an algebraic theory of integrable systems The book is intended for scientists lecturers and students interested in the field

Basic Economic Growth Theory Michael Welker, *SOFSEM 2005: Theory and Practice of Computer Science* Peter Vojtás, 2005-01-27 This book constitutes the refereed proceedings of the 31st Conference on Current Trends in Theory and Practice of Computer Science SOFSEM 2005 held in Liptovský Ján Slovakia in January 2005 The 28 revised full papers and 16 revised short papers presented together with 8 invited contributions were carefully reviewed and selected from 144 submissions The papers were organized in four topical tracks on foundations of computer science modeling and searching data in the web area software engineering and graph drawing and discrete computational mathematics
