Guide to Information Sources in Mathematics and Statistics Martha A. Tucker, Nancy D. Anderson, 2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free

Mathematics Unbound Karen Hunger Parshall, Adrian Clifford Rice, Although today s mathematical research community takes its international character very much for granted this global nature is relatively recent having evolved over a period of roughly 150 years from the beginning of the nineteenth century to the middle of the twentieth century During this time the practice of mathematics changed from being centered on a collection of disparate national communities to being characterized by an international group of scholars for whom the goal of mathematical research and cooperation transcended national boundaries Yet the development of an international community was far from smooth and involved obstacles such as war political upheaval and national rivalries Until now this evolution has been largely overlooked by historians and mathematicians alike This book addresses the issue by bringing together essays by twenty experts in the history of mathematics who have investigated the genesis of today s international mathematical community This includes not only developments within component national mathematical communities such as the growth of societies and journals but also

more wide ranging political philosophical linguistic and pedagogical issues The resulting volume is essential reading for anyone interested in the history of modern mathematics It will be of interest to mathematicians historians of mathematics and historians of science in general **The Textual Culture of English Protestant Dissent 1720-1800** Tessa

Whitehouse, 2015-12-17 Religious dissenters and their literary and social heritage are the principal subjects of this book At its heart is a group of English men whose activities were local transcontinental and circum Atlantic Drawing on letters lecture notes manuscript accounts of academies and a range of printed texts and paratexts *The Textual Culture of English Protestant Dissent 1720-1800* explores the connections between dissent education and publishing in the eighteenth century By considering Isaac Watts and Philip Doddridge in relation to their mentors students friends and readers it emphasizes the importance they and their associates attached to personal relationships in their private interactions and in print It argues that this contributed to a distinctive literary style as well as particular modes of textual production for moderate orthodox dissenters which reached beyond their own community to address and influence global discourses about education enlightenment and history The book's focus on textual culture foregrounds relationships between forms as well as considering texts as they existed in one form or another In examining textual culture this book emphasises adaptation transformation fluidity and communality it approaches the human relationships that make texts including friendships reading communities intellectual exchange and business arrangements with as much care as the content of the texts themselves The book demonstrates that models of family and social authorship among Romantic era dissenters advanced by Michelle Levy Daniel White and Felicity James were rooted in the domestic culture at earlier academies and in the example of members of the Watts Doddridge circle **The Critical Review, Or, Annals of Literature** Tobias Smollett, 1803 **Auction**
