Breaking Images Brian Greer,David Kollosche,Ole Skovsmose,2024-12-11 Mathematics is an activity something we do not just something inert that we study This rich collection begins from that premise to explore the various social influences institutional forces and lived realities that shape and mould the study and practice of mathematics and are moulded by it in turn These twenty one essays explore questions of mathematics as a topic of philosophy but also the nature and purpose of mathematics education and the role of mathematics in moulding citizens It challenges the biases and prejudices inherent within uninformed histories of mathematics including problems of white supremacy the denial of cultural difference and the global homogenization of teaching methods In particular the book contrasts the effectiveness of mathematics and science in modelling physical phenomena and solving technical problems with its ineffectiveness in modelling social phenomena and solving human problems and urges us to consider how mathematics might better meet the urgent crises of our age The book addresses anybody who is interested in reflecting on the role of mathematics in society from different perspectives It allows mathematicians to ponder about the cultural connections of mathematics and provides new perspectives for philosophical sociological and cultural studies of mathematics Because of the book s emphasis on education in mathematics it is especially interesting for mathematics teachers and teacher educators to challenge their understanding of the subject

The Post-colonial Studies Reader Bill Ashcroft,Gareth Griffiths,Helen Tiffin,1995 The Post Colonial Studies Readeris the most comprehensive selection of key texts in post colonial theory and criticism yet compiled This collection covers a huge range of topics featuring nearly ninety of the discipline s most widely read works TheReader s90 extracts are designed to introduce the major issues and debates in the field of post colonial literary studies This field itself however has become so varied that no collection of readings could encompass every voice which is now giving itself the name post colonial The editors in order to avoid a volume which is simply a critical canon have selected works representing arguments with which they do not necessarily agree but rather which above all stimulate discussion thought and further exploration Post colonial theory has occurred in all societies into which the imperial force of Europe has intruded though not always in the official form oftheoretical text Like the description of any other field the term has come to mean many things but this volume hinges on one incontestable phenomenon the historical factof colonialism and the palpable consequences to which this phenomenon gave rise The topic involves talk about experience of various kinds migration slavery suppression resistance representation difference race gender place and reaction to the European influence and about the fundamental experiences of speaking and writing by which all these come into being In compiling this reader the editors

have sought to stimulate people to ask How might a genuinely post colonial literary enterprise proceed The fourteen sections include Issues and Debates Universality and Difference Textual Representation and Resistance Postmodernism and Post Colonialism Nationalism Hybridity Ethnicity and Indigeneity Feminism and Post Colonialism Language The Body and Performance History Place Education and Production and Consumption Contributors include many of the leading post colonial theorists and critics such as Franz Fanon Chinua Achebe Gayatri Chakravorty Spivak Ngugi wa Thiong'o Homi Bhabha Derek Walcott Edward Said and Trinh T Minh ha in addition to a number of the discourse's newer voices The Post Colonial Studies Reader will prove an authoritative compilation representing an invaluable contribution to the study of post colonial theory and criticism
