So What Now? Time for learning in your school to face the future John West Burnham, Malcolm Groves, 2022-07-19 It is not the role of schools to solve the climate crisis or any of the other multiple crises now facing humankind But it is powerfully their role if they so choose to equip young people as well as possible to deal with the consequences of the serious problems they will be inheriting from their elders not betterers Could it be our collective failure to respond effectively to the threat of the climate emergency or the challenges of the pandemic has been shaped to a small but significant degree by the nature of the learning that happens in our schools and a failure to enable young people to learn appropriately there That question lies at the heart of this thought provoking new book as it unpicks the concept of deep learning for future sustainability This combines deep understanding with action and links both to moral purpose It is not enough just to be concerned about climate change awareness must lead to action The book draws on an eclectic range of

sources case studies of actual practice critical perspectives and opportunities for reflection The authors argue that first and foremost it is for educators and leaders to get on as best they can in their own school context to do what is both necessary and right to secure learning fit for a just and sustainable future irrespective of governmental lead in these matters In doing so the authors set out some clear evidence informed principles for school development and leadership that are central to the success of that mission

Experiencing School Mathematics Jo Boaler, 2002-12-18 NORTH AMERICAN RIGHTS ONLY

This is a revised edition of *Experiencing School Mathematics* first published in 1997 by Open University Press Jo Boaler This revised edition is for sale in North America only The first book to provide direct evidence for the effectiveness of traditional and reform oriented teaching methods *Experiencing School Mathematics* reports on careful and extensive case studies of two schools that taught mathematics in totally different ways Three hundred students were followed over three years providing an unusual and important range of data including observations interviews questionnaires and assessments to show the ways students beliefs and understandings were shaped by the different approaches to mathematics teaching The interviews that are reproduced in the book give compelling insights into what it meant to be a student in the classrooms of the two schools Questions are raised about and new evidence is provided for the ways in which traditional and reform oriented mathematics teaching approaches can impact student attitude beliefs and achievement the effectiveness of different teaching methods in preparing students for the demands of the real world and the 21st century the impact of tracking and heterogeneous ability grouping and gender and teaching styles the potential of different teaching approaches for the attainment of equity The book draws some radical new conclusions about the ways that traditional teaching methods lead to limited forms of knowledge that are ineffective in non school settings This edition has been revised for the North American market to show the relevance of the study results in light of the U S reform movement the math wars and debates about teachers assessment and tracking The details of the study have been rewritten for an American audience and the results are compared with research conducted in the U S This is an important volume for mathematics teachers and researchers education policymakers and for students in mathematics education courses
