Power Structure And Urban Policy Who Rules In Oakland:

Power Structure and Urban Policy: who Rules in Oakland? Edward Cary Hayes, 1971 **On the Cross Road of Polity, Political Elites and Mobilization** Barbara Wejnert, Paolo Parigi, 2016-12-21 This volume discusses the various interrelations that exist within and between social and political phenomena **An Introduction to Political Geography** John Rennie Short, 2002-09-26 Entirely revised and updated this reviews the history of the rise and fall of centres of power and draws on a wide range of case studies to illustrate current trends and offers discussion of future developments in a useful compact form **The Color of Power** Frédérick Douzet, 2012 This book examines the contemporary politics of race in Oakland California with a detailed study of conflicts over issues like education elections and political representation and crime *When Communities Assess their AIDS Epidemics* , *The Black Professional Middle Class* Eric S. Brown, 2013-11-07 Through an in depth case study of the black professional middle class in Oakland this book provides an analysis of the experiences of black professionals in the workplace community and local politics Brown shows how overlapping dynamics of class formation and racial formation have produced historically powerful processes of what he terms racialized class formation resulting in a distinct and internally differentiated entity not merely a subset of a larger professional middle class *Urban Development and New Towns in the Third World* Alain R.A. Jacquemin, 2019-01-22 First published in 1999 this volume examines India and Bombay countries which represent some of the world s most dramatic examples of rapid urban growth One of the strategies frequently adopted by the Indian authorities to cope with this urban growth is the development of new towns such as New Bombay which is India s largest and most significant urban planning experience since Independence The New Bombay model based on a specific planning and financing strategy is considered highly successful and so is increasingly being copied and implemented in other urban areas of India This volume makes the first independent evaluation of New Bombay and sets it in a wider Third World urban development context As well as analysing the processes of physical and economic growth the volume also examines the process of social development and in particular the consequences of this planning concept for the urban poor *Working People of California* Daniel Cornford, 2023-11-15 From the California Indians who labored in the Spanish missions to the immigrant workers on Silicon Valley s high tech assembly lines California s work force has had a complex and turbulent past marked by some of the sharpest and most significant battles fought by America s working people This anthology presents the work of scholars who are forging a new brand of social history one that reflects the diversity of California s labor force by paying close attention to the multicultural and gendered aspects of the past Readers will discover a refreshing chronological breadth to this volume as well as a balanced examination of both rural and urban communities Daniel Cornford s excellent general introduction provides essential historical background while his brief introductions to each chapter situate the essays in their larger contexts A list of further readings appears at the end of each chapter This title is part of UC Press s Voices Revived program

which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1995 ***An International History of the Black Panther Party*** Jennifer B. Smith, 1999 This work uncovers the global history of the Black Panther Party a key post civil rights organization and shows how an international approach broadens and changes our understanding of African American history Given the increasing public interest in the Black Panthers this study seeks to go beyond the myths and public persona of the organization It examines the party's connections and activities in a variety of places including Cuba Algeria and Europe and demands that we look beyond national boundaries when discussing African American protest movements of the 1960s and 1970s In addition it provides an in depth look at Panther activities in a seemingly unlikely place Halifax Nova Scotia where the Panthers served as the catalyst for significant changes in race relations This study also provides extensive background on the post civil rights era including the effects of a shift to a post industrial economy the disillusionment of many African Americans with the traditional civil rights organizations and the effects of large scale national demographic changes ***The Politics of School Reform, 1870 - 1940*** Paul E. Peterson, 1985-07 Was school reform in the decades following the Civil War an upper middle class effort to maintain control of the schools Was public education simply a vehicle used by Protestant elites to impose their cultural ideas upon recalcitrant immigrants In *The Politics of School Reform 1870 1940* Paul E Peterson challenges such standard revisionist interpretations of American educational history Urban public schools he argues were part of a politically pluralistic society Their growth both in political power and in sheer numbers had as much to do with the demands and influence of trade unions immigrant groups and the public more generally as it did with the actions of social and economic elites Drawing upon rarely examined archival data Peterson demonstrates that widespread public backing for the common school existed in Atlanta Chicago and San Francisco He finds little evidence of systematic discrimination against white immigrants at least with respect to classroom crowding and teaching assignments Instead his research uncovers solid trade union and other working class support for compulsory education adequate school financing and curricular modernization Urban reformers campaigned assiduously for fiscally sound politically strong public schools Often they had at least as much support from trade unionists as from business elites In fact it was the business backed machine politicians from San Francisco's William Buckley to Chicago's Edward Kelly who deprived the schools of funds At a time when public schools are being subjected to searching criticism and when new educational ideas are gaining political support *The Politics of School Reform 1870 1940* is a timely reminder of the strength and breadth of those groups that have always supported free public schools ***Nuclear Power and Social Power*** Rick Eckstein, 1997 We often think of progress and economic growth as natural developments that benefit various members of society This title challenges this view and instead suggests that specific definitions of progress and economic growth can be

molded by powerful individuals organizations and classes **The Second Gold Rush** Marilyn S. Johnson,1996-12-29 At last a close in account of California during its moment of rebirth World War II A book that helps us to understand California s past and also its present James N Gregory author of American Exodus **Making Local News** Phyllis Kaniss,1991-09-24 Why do crimes and accidents earn more news coverage than development and policy issues affecting thousands of people Filled with revealing interviews with both journalists and city officials Making Local News is the first comprehensive look at how the economic motives of media owners professional motives of journalists and the strategies of media wise politicians shape the news we see and hear thereby influencing urban policy Making Local News by Phyllis Kaniss is significant If we can continue to get smarter about that which journalism leaves out or distorts in its coverage of politics we may eventually get smarter about politics itself Mitchell Stephens The Philadelphia Inquirer View A convincing analysis of the factors and forces which color how and why local issues do or do not become newsworthy Michael H Ebner Journal of Interdisciplinary History This work serves as a reminder of the importance of a medium that is often overlooked until economic realities threaten its very existence Choice Kaniss is truly a pioneer in the study of local news Susan Herbst Contemporary Sociology

Alabaster Cities John Rennie Short,2006-12-05 With keen insight and exhaustive research John Rennie Short narrates the story of urban America from 1950 to the present revealing a compelling portrait of urban transformation Short chronicles the steady rise of urbanization the increasing suburbanization and the sweeping metropolitanization of the U S uncovering the forces behind these shifts and their consequences for American communities Drawing on numerous studies first hand anecdotes census figures and other statistical data Short s work addresses the globalization of U S cities the increased polarization of urban life in the U S the role of civic engagement and the huge role played by the public sector in shaping the character of cities With deft analysis the author weaves together the themes of urban renewal suburbanization and metropolitan fragmentation race and ethnicity and immigration presenting a fascinating and highly readable account of the U S in the second half of the twentieth century Urban Policy Dennis J. Palumbo,George Albert Taylor,1979 Groundwork Jeanne Theoharis,Komozi Woodard,2005 A groundbreaking collection of essays on the civil rights movement focusing on smaller regional civil organizations across the country not just in the South *Essays on the Study of Urban Politics* Ken Young,1975-06-18 Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1973 **In the Crossfire** John P. Spencer,2012-08-16 As media reports declare crisis after crisis in public education Americans find themselves hotly debating educational inequalities that seem to violate their nation s ideals Why does success in school track so closely with race and socioeconomic status How to end these apparent achievement gaps In the Crossfire brings historical perspective to these debates by tracing the life and work of Marcus Foster an African American educator who struggled to reform urban schools in the 1960s and early 1970s As a teacher principal and superintendent first in his native Philadelphia and eventually in Oakland California Foster made success stories of urban schools and children whom others had dismissed

as hopeless only to be assassinated in 1973 by the previously unknown Symbionese Liberation Army in a bizarre protest against an allegedly racist school system Foster's story encapsulates larger social changes in the decades after World War II the great black migration from South to North the civil rights movement the decline of American cities and the ever increasing emphasis on education as a ticket to success Well before the accountability agenda of the No Child Left Behind Act or the rise of charter schools Americans came into sharp conflict over urban educational failure with some blaming the schools and others pointing to conditions in homes and neighborhoods By focusing on an educator who worked in the trenches and had a reputation for bridging divisions In the Crossfire sheds new light on the continuing ideological debates over race poverty and achievement Foster charted a course between the extremes of demanding too little and expecting too much of schools as agents of opportunity in America He called for accountability not only from educators but also from families taxpayers and political and economic institutions His effort to mobilize multiple constituencies was a key to his success and a lesson for educators and policymakers who would take aim at achievement gaps without addressing the full range of school and nonschool factors that create them

Hella Town Mitchell Schwarzer, 2022-08-16 Hella Town reveals the profound impact of transportation improvements systemic racism and regional competition on Oakland's built environment Often overshadowed by San Francisco its larger and more glamorous twin Oakland has a fascinating history of its own From serving as a major transportation hub to forging a dynamic manufacturing sector by the mid twentieth century Oakland had become the urban center of the East Bay Hella Town focuses on how political deals economic schemes and technological innovations fueled this emergence but also seeded the city's postwar struggles Toward the turn of the millennium as immigration from Latin America and East Asia increased Oakland became one of the most diverse cities in the country The city still grapples with the consequences of uneven class and race based development amid disruption How do past decisions about where to locate highways or public transit urban renewal districts or civic venues parks or shopping centers influence how Oaklanders live today A history of Oakland's buildings and landscapes its booms and its busts provides insight into its current conditions an influx of new residents and businesses skyrocketing housing costs and a lingering chasm between the haves and have nots
