

BEHAVIOR MODIFICATION TECHNIQUES

DEFINITION

Behavior modification techniques are strategies and interventions used to change or replace undesirable behaviors with more desirable ones by manipulating environmental factors, rewards, or consequences. These techniques are often grounded in principles of operant conditioning.

EXAMPLES

- **Rewards:** Providing a positive stimulus or incentive, such as candy, in response to a desired behavior to increase its frequency.
- **Punishment:** Introducing an aversive consequences after an undesired behavior, e.g. no-play time at lunch, to decrease its occurrence.

Behavior Modification in Black Populations Samuel M. Turner, 2012-12-06. During the past decade, research and practice in the field of

behavior modification have experienced phenomenal growth Behavioral intervention strategies that were considered strictly experimental a few years ago are now accepted therapeutic modalities and behavioral methodology has been instrumental in creating an atmosphere conducive to the development of scientific rigor in the area of mental health But behavioral influence has not been limited to mental health There has been considerable impact in education industry government and general health care Although behavior modification has made a significant impact on psychology in general there has been a noticeable lack of theorizing and empirical research on issues primarily related to black populations In fact the black community in general and black psychologists in particular often have viewed behavioral approaches with suspicion We hope that the material presented in this volume will serve to clarify what the behavioral approach is and what it is not and that it will help to foster an understanding of the behavioral approach Moreover empirical data demonstrating the effectiveness of behavioral procedures with black populations are presented It is our hope that the material will provide some insight into how behavioral theory methodology and therapeutic strategies can be used to the benefit of black mental health in particular and the overall psychological health of the black community in general
