Invariant Measurement with Raters and Rating Scales George Engelhard Jr.,Stefanie Wind,2017-12-15 The purpose of this book is to present methods for developing evaluating and maintaining rater mediated assessment systems Rater mediated assessments involve ratings that are assigned by raters to persons responding to constructed response items e g written essays and teacher portfolios and other types of performance assessments This book addresses the following topics 1 introduction to the principles of invariant measurement 2 application of the principles of invariant measurement to rater mediated assessments 3 description of the lens model for rater judgments 4 integration of principles of invariant measurement with the lens model of cognitive processes of raters 5 illustration of substantive and psychometric issues related to rater mediated assessments in terms of validity reliability and fairness and 6 discussion of theoretical and practical issues related to rater mediated assessment systems Invariant measurement is fast becoming the dominant paradigm for assessment systems around the world and this book provides an invaluable resource for graduate students measurement

practitioners substantive theorists in the human sciences and other individuals interested in invariant measurement when judgments are obtained with rating scales **Knowledge Spaces** Jean-Paul Doignon, Jean-Claude Falmagne, 2012-12-06 Knowledge spaces offer a rigorous mathematical foundation for various practical systems of knowledge assessment An example is offered by the ALEKS system Assessment and LEarning in Knowledge Spaces a software for the assessment of mathematical knowledge From a mathematical standpoint knowledge spaces generalize partially ordered sets They are investigated both from a combinatorial and a stochastic viewpoint The results are applied to real and simulated data The book gives a systematic presentation of research and extends the results to new situations It is of interest to mathematically oriented readers in education computer science and combinatorics at research and graduate levels The text contains numerous examples and exercises and an extensive bibliography **Handbook of Psychological Assessment** Gerald Goldstein, Michel Hersen, 2000-02-16 The field of psychological assessment has been undergoing rapid change The second edition of this Handbook published in 1990 appeared at the beginning of a decade marked by extensive advances in assessment in essentially all of its specialized areas There are many new tests new applications of established tests and new test systems Major revisions have appeared of established tests notably the Wechsler intelligence scales The time seemed right for a third edition since even over the relatively brief period of ten years many tests described in the second edition have been replaced and are no longer commonly used Furthermore much new research in such areas as neuropsychology cognitive science and psychopathology have made major impacts on how many tests and other assessment procedures are used and interpreted This third edition represents an effort to give the reader an overview of the many new developments in assessment while still maintaining material on basic psychometric concepts in order for it to continue to serve as a comprehensive handbook for the student and professional *Preventing Mental Disorders* National Institute of Mental Health (U.S.), 1987 **Annals of Theoretical Psychology** Paul Van Geert, Leendert P. Mos, 2013-11-11 This is the first of a two volume work in the Annals series devoted to developmental psychology The project was originally conceived in 1985 when Paul van Geert who had just completed his Theory building in developmental psychology North Holland 1986 agreed to collaborate on an Annals volume examining foundational issues pertaining to the concept of development The project attracted considerable interest and in view of the length of the resulting manuscript a decision was made to publish it in two volumes Fortunately the contributors provided coherent perspectives on two relatively distinct developmental themes which served to facilitate our task of dividing their contributions into two volumes The first volume deals with the foundations of developmental theory and methodology the second volume to appear as Volume 8 of the Annals with theoretical issues in developmental psychology In this first volume the contributions by Willis Overton and Joachim Wohlwill were completed in 1988 those by Roger Dixon Richard Lerner and David Hultsch and Paul van Geert in 1989 Commentaries followed quickly and replies to commentaries were completed in 1990 Paul van Geert provides a general framework within which the founda

tional issues of development are discussed He is especially concerned with the nature of transition models and the structure of time in developmental theory The relationship between methods and framework or theory is the topic of Joachim Wohlwill's contribution

SAGE Quantitative Research Methods W Paul Vogt, 2011-01-01 For more than 40 years SAGE has been one of the leading international publishers of works on quantitative research methods in the social sciences This new collection provides readers with a representative sample of the best articles in quantitative methods that have appeared in SAGE journals as chosen by W Paul Vogt editor of other successful major reference collections such as *Selecting Research Methods* 2008 and *Data Collection* 2010 The volumes and articles are organized by theme rather than by discipline Although there are some discipline specific methods most often quantitative research methods cut across disciplinary boundaries
