Principles Of Global Security:

Principles of Global Security John D. Steinbruner, 2000 From the earliest human records warfare has been both an organizing focus and a prime source of political motivation Countless battles have been fought in the course of colonizing the planet and the experience has created a legacy of military confrontation that many people consider immutable Since preparations for war and the occasional conduct of it have been central preoccupations for virtually all the major states throughout time it is widely assumed that the pattern is rooted in human nature and will endure indefinitely But contemporary civilization is undergoing a monumental transformation affecting its most basic features The combined effects of information technology population dynamics and the globalization of economic activity are altering some of the critical operating conditions of human societies and appear to be inducing a new pattern of interaction Correspondingly fundamental changes in the practice of war or what is now more politely called international security can be expected to follow Principles of Global Security anticipates the major implications of this massive transformation for security policy John D Steinbruner one of the nation s leading specialists on defense issues identifies formative problems and organizing principles relating to the predictable issues of security He examines in sequence how the configuration of nuclear and conventional forces might be affected how the problems of communal violence and dangers of technical proliferation might be managed and how security relationships among the major states might be altered One of the fundamental implications of globalization in a post cold war environment is a shift in security policy from deterrence to reassurance from active confrontation to cooperative engagement Without an opponent to justify preparation for large scale traditional missions nations must establish safer and less volatile patterns of deployment Maintaining global security in the twenty first century calls for a reconfiguration of basic relationships among historical opponents as well as revisions in military practices This visionary work will stimulate productive thinking among policymakers seeking to reshape the legacies of the cold war with a new conceptualization of international security Principles of International Energy Transition Law Frédéric Gilles Sourgens, Leonardo

International Humanitarian Law MichaelN. Schmitt,2017-07-05 The essays selected for the first part of this volume offer an insight into the development as distinguished from the history of international humanitarian law The focus of the majority of the works reprinted here is on an analysis of the adequacy of the law as it stood at the time of the respective publication and in the light of existing contemporary armed conflicts and military operations Thus the reader is afforded an in depth look at the early roots of international humanitarian law the continuing relevance of that body of law despite advances in weapons technology and the efforts to progressively develop it International humanitarian law s development cannot be considered in isolation from its principles The essays selected for the second part of the volume deal with the two fundamental principles underlying all of international humanitarian law humanity and military necessity The articles on the principles of humanity include reflections on the famous Martens Clause and the analyses of military necessity take no account of Kriegsraison

Global Governance, Human Rights and International Law Errol P. Mendes, 2014-02-05 This book offers a stimulating introduction to the links between areas of global governance human rights global economy and international law By drawing on a range of diverse subject areas Errol P Mendes argues that the foundations of global governance human rights and international law are undermined by a conflict or tragic flaw where insistence on absolute conceptions of state sovereignty are pitted against universally accepted principles of justice and human rights resulting in destructive self interest for both the state and the global community The book explores how human rights and international law are applied in some of the critical institutions of global governance and in the operations of the global private sector and how States institutions and global civil society struggle to fight this tragic flaw The book is brought up to date by considering developments in the role of the IMF the World Bank bilateral investment treaties the likely failure of the Doha round of WTO negotiations the legacy of the 2008 financial crisis and the role of the International Criminal Court and the evolving Responsibility to Protect doctrine in international peace and security crises in the Middle East Central and West Africa among other regions of the world With its intensely interdisciplinary approach this book motivates new thinking in the realm of global governance and international law and promotes the development of new strategies for negotiating between conflicting leadership and organisational values within global institutions The book will be of great interest and use to students and researchers of public international law international relations and political science business and human rights global governance and international trade and economic law

EU International Relations Law Panos Koutrakos, 2006-04-14 In the post 9/11 world the European Union has been trying to define its international presence in a way which corresponds to its economic power and enlarged membership. In an effort to assert its identity on the international scene it has developed a very wide range of economic relations with third countries and international organisations. It has also developed a Common Foreign and Security Policy in the context of which it is gradually shaping its Security and Defence Policy. These policies are carried out on the basis of distinct albeit interrelated sets of legal rules. This book provides a comprehensive and systematic analysis of these economic, political and security aspects of the relations of the European Union with the rest of the world. It examines their genesis, development and interactions and places them in the specific context of the establishment of the internal market and the broader context of the increasingly interdependent international economic and geopolitical environment. Issues covered include the coexistence of Community and national competence in external relations, the approach of the Court of Justice to international law, the negotiation, conclusion and implementation of international agreements, the relationship between EC and WTO law and the development of the political and security policies of the Union. The book will be of interest to academics, practitioners and students of EU law.
