Clift, 2020-02-07 A contemporary guide to the diagnostic principles and practices of immunology and serology in the clinical laboratory **Immunodiagnosics** R. Edwards, 1999-11-25 Immunodiagnostic tests are analytical methods that use antibodies as reagents whose results are used to aid diagnosis and are widely used in many scientific disciplines and in many different ways Perhaps the most widespread and obvious use is in clinical applications but immunodiagnostic tests are also used in other fields such as forensic science and environmental and food analysis The different types of test range from simple manual methods to fully automated systems with sophisticated integrated detection Immunodiagnosics A Practical Approach starts off by explaining the principles and development of immunodiagnostic tests specifically the use of radioisotopes as tracers Chapter 2 explains the use of solid phase supports to bind immunoreagents Enzymes are widely used as labels in immunoassays and their use with colourimetric fluorimetric and chemiluminescent detection systems is described The use of enzymes as labels reflects the move away from radioisotopes and one of the most powerful non radioisotopic procedures is the time resolved fluorescence assay Enzymes can also be used as a simple method of obtaining high performance from immunodiagnosics and this application is covered later in the book The next set of techniques to be described are light scattering techniques which can be used in either simple manual assays or in sophisticated automated procedures The penultimate chapter describes the principles of automation of immunodiagnostic tests The last topic to be discussed is that of quality assurance Clinical Immunodiagnosics: Laboratory Principles and Practices Ian C. Clift, 2020-02-07 A contemporary guide to the diagnostic principles and practices of immunology and serology in the clinical laboratory *Current Catalog* National Library of Medicine (U.S.), 1979 First multi year cumulation covers six years 1965 70 **Handbook of Molecular Biotechnology** Dongyou Liu, 2024-09-05 With a history that likely dates back to the dawn of human civilization more than 10 000 years ago and a record that includes the domestication and selective breeding of plants and animals the harnessing of fermentation
