Principles Practice Of Radar 4ed:

Construction Technology For Tall Buildings (4th Edition) Yit Lin Michael Chew, 2012-06-04 This book introduces the latest construction practices and processes for tall buildings from foundation to roof. It attempts to acquaint readers with the methods, materials, equipment, and systems used for the construction of tall buildings. The text progresses through the stages of site investigation, excavation and foundations, basement construction, structural systems for the superstructure, site and material handling, wall and floor construction, cladding, and roof construction. The construction sequence, merits, and limitations of the various proprietary systems commonly used in these respective stages are discussed. This fourth edition also includes several new topics not covered in the previous edition. The target readers are practitioners and students in the related professions including architecture, engineering, building, real estate, construction project and facilities management, and quantity and land surveying. **Principles and Practice of Radar, etc. (Fourth edition, revised and enlarged.).**

Harold Ernest PENROSE (and BOULDING (Reginald Sidney Henry)), Reginald Sidney Henry BOULDING, 1953 Advanced Ultrawideband Radar James D. Taylor, 2016-12-19 This book presents the latest theory, developments, and applications related to high-resolution materials penetrating sensor systems. An international team of expert researchers explains the problems and solutions for developing new techniques and applications. Subject areas include ultrawideband (UWB) signals, propagation and scattering, materials penetrating radar techniques for small object detection and imaging, biolocation using holographic techniques, tomography, medical applications, nondestructive testing methods, electronic warfare, principles through the wall radar, propagation effects, and target identification through measuring the target return signal spectrum changes.

Managing Airports 4th Edition Anne Graham, 2013-10-15 *Managing Airports* presents a comprehensive and cutting-edge insight into today's international airport industry. Approaching management topics from a strategic and commercial perspective rather than from an operational and technical angle, the book provides an innovative insight into the processes behind running a successful airport. This 4th edition has been fully revised and updated to reflect the many important developments in the management of airports and issues facing the aviation industry since the 3rd edition. The 4th edition features new content on coping with an increasingly volatile and uncertain operating environment, social media, and other trends in technology; the evolving airport-airline relationship; responding to sustainability pressures and new security policies; a new chapter focused solely on service quality and the passenger experience. This is to reflect the increasing need for airports to offer wide-ranging and quality services to their diverse customer base to remain competitive and to achieve high satisfaction levels. Updated and new international case studies show recent issues and theory in practice. New case studies on emerging economies such as China, India, and Brazil. Accessible and up-to-date. *Managing Airports* is ideal for students, lecturers, and researchers of transport and tourism, and practitioners within the air transport industry. *EJKM Volume 9 Issue 1*, **The Publishers' Circular and Booksellers' Record**, 1959 **The Bookseller**, 1959 Vols for 1871-76, 1913
