Privacy and Identity in a Networked Society Stefan Strauß, 2019-04-16 This book offers an analysis of privacy impacts resulting from and reinforced by technology and discusses fundamental risks and challenges of protecting privacy in the digital age Privacy is among the most endangered species in

our networked society personal information is processed for various purposes beyond our control Ultimately this affects the natural interplay between privacy personal identity and identification This book investigates that interplay from a systemic socio technical perspective by combining research from the social and computer sciences It sheds light on the basic functions of privacy their relation to identity and how they alter with digital identification practices The analysis reveals a general privacy control dilemma of digital identification shaped by several interrelated socio political economic and technical factors Uncontrolled increases in the identification modalities inherent to digital technology reinforce this dilemma and benefit surveillance practices thereby complicating the detection of privacy risks and the creation of appropriate safeguards Easing this problem requires a novel approach to privacy impact assessment PIA and this book proposes an alternative PIA framework which at its core comprises a basic typology of personally and technically identifiable information This approach contributes to the theoretical and practical understanding of privacy impacts and thus to the development of more effective protection standards This book will be of much interest to students and scholars of critical security studies surveillance studies computer and information science science and technology studies and politics

Introduction to Privacy

Enhancing Technologies Carlisle Adams, 2021-10-30 This textbook provides a unique lens through which the myriad of existing Privacy Enhancing Technologies PETs can be easily comprehended and appreciated It answers key privacy centered questions with clear and detailed explanations Why is privacy important How and why is your privacy being eroded and what risks can this pose for you What are some tools for protecting your privacy in online environments How can these tools be understood compared and evaluated What steps can you take to gain more control over your personal data This book addresses the above questions by focusing on three fundamental elements It introduces a simple classification of PETs that allows their similarities and differences to be highlighted and analyzed It describes several specific PETs in each class including both foundational technologies and important recent additions to the field It explains how to use this classification to determine which privacy goals are actually achievable in a given real world environment Once the goals are known this allows the most appropriate PETs to be selected in order to add the desired privacy protection to the target environment To illustrate the book examines the use of PETs in conjunction with various security technologies with the legal infrastructure and with communication and computing technologies such as Software Defined Networking SDN and Machine Learning ML Designed as an introductory textbook on PETs this book is essential reading for graduate level students in computer science and related fields prospective PETs researchers privacy advocates and anyone interested in technologies to protect privacy in online environments

Koen, Vladimir a. Oleshchuk, 2025-01-13 The modern society is rapidly becoming a fully digital society This has many benefits but unfortunately it also means that personal privacy is threatened The threat does not so much come from a 1984 style Big Brother but rather from a set of smaller big brothers The small big brothers are companies that we interact with they are public services and institutions Many of these little big brothers are indeed also being invited to our private data by ourselves Privacy as a subject can be problematic At the extreme it is personal freedom against safety and security We shall not take a political stand on personal privacy and what level of personal freedom and privacy is the correct one Aspects of Personal Privacy in Communications is mostly about understanding what privacy is and some of the technologies may help us to regain a bit of privacy We discuss what privacy is about what the different aspects of privacy may be and why privacy needs to be there by default There are boundaries between personal privacy and societal

requirements and inevitably society will set limits to our privacy Lawful Interception etc There are technologies that are specifically designed to help us regain some digital privacy These are commonly known as Privacy Enhancing Technologies PETs We investigate some these PETs including MIX networks Onion Routing and various privacy preserving methods Other aspects include identity and location privacy in cellular systems privacy in RFID Internet of Things IoT and sensor networks amongst others Some aspects of cloud systems are also covered
