Agency for International Development, 1989 Aid and Influence Stephen Browne, 2012-04-27 Aid is always a means of influence political commercial military and security related Some influence is benign but much of it is coercive even imperialistic Given the nature of aid its effectiveness should be judged not only in developmental terms but in terms of international relations Even donors agree that on both counts the returns are meagre This book drawing on the author's 30 years of field experience proposes two kinds of solution donors should climb down from paternalistic central planning practices and support public goods that are neutral and beneficial cancellation of debt fair trade responsible economic governance vaccine production peace making and peace keeping For their part developing countries should follow the example of the most successful among them recognize the true costs of free aid exercise their prerogative to choose their development partners and start paying their own way Forest Transition Deficiency Syndrome Emmanuel Ametepheh, 2019-01-04 While previous studies focus on lack of enforcement of forest laws poverty and ecological values of forest dependent people coherent studies on people's motivations for forest illegalities and non compliance behavior remain scanty Emmanuel Ametepheh argues that the systematic analysis of cause and effect patterns related to forest management measures and policies through the lenses of the Forest Transition Theory uncovers severe limitations The resulting multi complex stress factors adversely impact and hence manifest in the form of deviant compliance behavior syndrome in the management endeavor of forest fringe people The Author shows that motivations for forest illegalities and associated non compliance behavior is largely an outcome of adverse experiences forest people have been subjected to as a result of historical and contemporary neglects and marginalization in the management endeavor **World Development Indicators**, 1983 **World Development Indicators 2006**, 2006-01-01 Looking for accurate up to date data on development issues This indispensable statistical reference allows you to consult over 800 indicators for some 150 economies and 14 country groups in more than 80 tables It provides a current overview of the most recent data available as well as important regional data and income group analysis in six thematic chapters World View People Environment Economy States and Markets and Global Links Water Management and Investment in the New Independent States OECD, 2001-07-30 This volume analyses the causes underlying the dire state of water infrastructure in

Law in Transition Ruth Buchanan,Peer Zumbansen,2014-12-01 Law has become the vehicle by which countries in the developing world including post conflict states or states undergoing constitutional transformation must steer the course of social and economic legal and political change Legal mechanisms in particular the instruments as well as concepts of human rights play an increasingly central role in the discourses and practices of both development and transitional justice These developments can be seen as part of a tendency towards convergence within the wider set of discourses and practices in global governance While this process of convergence of formerly distinct normative and conceptual fields of theory and practice has been both celebrated and critiqued at the level of theory the present collection provides through a series of studies drawn from a variety of contexts in which human rights advocacy and transitional justice initiatives are colliding with development projects programmes and objectives a more nuanced and critical account of contemporary developments The book includes essays by many of the leading experts writing at the intersection of development rights and transitional justice studies Notwithstanding the theoretical and practical challenges presented by the complex interaction of these fields the premise of the book is that it is only through engagement and dialogue among hitherto distinct fields of scholarship and practice that a better understanding of the institutional and normative issues arising in contemporary law and development and transitional justice contexts will be possible The book is designed for research and teaching at both undergraduate and graduate levels

ENDORSEMENTS An extraordinary collection of essays that illuminate the nature of law in today s fragmented and uneven globalized world by situating the stakes of law in the intersection between the fields of human rights development and transitional justice Unusual for its breadth and the quality of scholarly contributions from many who are top scholars in their fields this volume is one of the first that attempts to weave the three specialized fields and succeeds brilliantly For anyone working in the fields of development studies human rights or transitional justice this volume is a wake up call to abandon their preconceived ideas and frames and aim for a conceptual and programmatic restart Professor Balakrishnan Rajagopal Ford International Associate Professor of Law and Development Massachusetts Institute of Technology This superb collection of essays explores the challenges possibilities and limits faced by scholars and practitioners seeking to imagine forms of law that can respond to social transformation Drawing together cutting edge work across the three dynamic fields of law and development transitional justice and international human rights law this volume powerfully demonstrates that in light of the changes demanded of legal research education and practice in a globalizing world all law is law in transition Anne Orford Michael D Kirby Chair of International Law and Australian Research Council Future Fellow University of Melbourne A terrific volume Leading scholars of human rights development policy and transitional justice look back and into the future What has worked Where have these projects gone astray or conflicted with one another Law will only contribute forcefully to justice
