Washington's Dark Secret John Maszka,2018-10-08 As a scholar of terrorism John Maszka has examined how politics the media and the War on Terror play off one another His most startling claim is that the War on Terror is a war for natural resources and that terrorism has little to do with it Once the military became mechanized oil quickly became the most sought after commodity on the planet and the race for energy was eventually framed as a matter of national security Ironically Maszka argues the true threats to national security are the massive oil conglomerates themselves Maszka delves into the repercussions of a government that capitalizes on an us versus them mentality such as the demonizing of an entire religion sensationalizing radical violent attacks and loosely applying the word terrorism Because the United States current approach to terrorism has led to the politicization and abuse of the term Maszka suggests a need for a standardized definition of terrorism Currently too many acts of violence can be labeled terrorism resulting in state and nonstate actors labeling their enemies as terrorists yet claiming their own acts of violence as legitimate and retributive

Maszka argues that much of the violence labeled as terrorism today is not terrorism at all. In an ambitious attempt to connect seemingly unrelated events in politics and the media, Maszka offers an unflinching portrayal of the hypocrisy underlying our foreign policy.
