Short History Of Technology From The Earliest Times To Ad 19:

A Short History of Technology from the Earliest Times to A.D. 1900 Thomas Kingston Derry, Trevor Illtyd Williams, 1960-01-01 Highly readable profusely illustrated survey relates technology to history of every age food production metalworking mining steam power transportation electricity and much more 354 black and white illustrations 1961 edition

The Global Imperative Robert P Clark, 2018-02-12 Robert Clark delves into 100 millennia of human history to create a unified and consistent explanation for humankind's inner need to spread itself across the globe He examines key events from different eras such as the voyages of the Chinese treasure fleet the shaping of the Aztec's trade system in MesoAmerica the role of steam powered transport in the supply of an English city the rise of the gas powered engine and the digitization of information in the computer age melding them together to form a framework for understanding the process of globalization Drawing on a variety of academic disciplines including the physical sciences biology anthropology geography economics political science sociology and demography Clark reveals the spread of humans and their cultures to be part of an ongoing struggle to supply the energy needs of an increasingly large and complex society Entropy and thermodynamics terms often ignored or misunderstood by social science students clearly frame a fascinating vision of humans' inherent tendency toward a globalized world Although human expansion has drawn increasing attention in the last several decades as this tumultuous century has progressed Clark shows that the process of globalization is not a recent concept From the very roots of the species humankind has been driven by a range of internal and external factors to expand in order to survive the increasing complexity of human civilization

19th Century Europe Hannu Salmi, 2013-04-24 Nineteenth Century Europe offers a much needed concise and fresh look at European culture between the Great Revolution in France and the First World War It encompasses all major themes of the period from the rising nationalism of the early nineteenth century to the pessimistic views of fin de siècle It is a lucid fluent presentation that appeals to both students of history and culture and the general audience interested in European cultural history The book attempts to see the culture of the nineteenth century in broad terms integrating everyday ways of life into the story as mental material and social practices It also highlights ways of thinking mentalities and emotions in order to construct a picture of this period of another kind that goes beyond a story of isms or intellectual and artistic movements Although the nineteenth century has often been described as a century of rising factory pipes and grey industrial cities as a cradle of modern culture the era has many faces This book pays special attention to the experiences of contemporaries from the fear for steaming engines to the longing for the pre industrial past from the idle calmness of bourgeois life to the awakening consumerism of the department stores from curious exoticism to increasing xenophobia from optimistic visions of future to the expectations of an approaching end The century that is only a few

generations away from us is strange and familiar at the same time a bygone world that has in many ways influenced our present day world

Food Beyond Terroir Anna Colquhoun, Katharina Graf, 2025-10-01 From winemaking in occupied territories to fishing in polluted seas home cooking in refugee communities and vegan cheesemaking this collection explores the complex ways taste and place intersect with political ecological social and economic issues Through diverse ethnographic case studies leading food scholars examine the meaning and making of place and taste In doing so the book challenges terroir inspired notions of a fixed taste of place and pushes the boundaries of what we think we know about taste place relations

Mining in World History Martin Lynch, 2004-08-02 This book deals with the history of mining and smelting from the Renaissance to the present Martin Lynch opens with the invention sometime before 1453 of a revolutionary technique for separating silver from copper It was this invention which brought back to life the rich copper silver mines of central Europe in the process making brass cannon and silver coin available to the ambitious Habsburg emperors thereby underpinning their quest for European domination Lynch also discusses the Industrial Revolution and the far reaching changes to mining and smelting brought about by the steam engine the era of the gold rushes the massive mineral developments and technological leaps forward which took place in the USA and South Africa at the end of the 19th century and finally the spread of mass metal production techniques amid the violent struggles of the 20th century In an engaging concise and fast paced text he presents the interplay of personalities politics and technology that have shaped the metallurgical industries over the last 500 years
