*Making automatic enrolment work* Great Britain: Department for Work and Pensions, 2010-10-27 Current policy is that new duties will be staged in between 2012 and 2016 requiring all employers to designate a pension scheme into which all of their employees aged between 22 and state pension age should be automatically enrolled so long as they are earning above an annual earnings threshold the Pensions Act 2008 sets this at 5 035 equivalent to 5 732 in today s terms Upon automatic enrolment a minimum of eight per cent of earnings within a band would be contributed to the pension with at least three per cent coming from the employer This policy is designed to maximise private pension saving by individuals without imposing compulsion The right to opt out will remain This review looks at the scope of automatic enrolment and whether a new national pension scheme National Employment Savings Trust or NEST needs to be put in place for it to work One of the most significant recommendations that it makes is that people should only be automatically enrolled once they reach the income tax threshold which will increase to 7 475 in 2011 but that contributions should be on earnings in excess of the National Insurance earnings threshold 5 715 in today s prices There should be no changes to age thresholds and automatic enrolment duties should apply to all employers regardless of size as now Employers should be given three months before auto enrolment to ease the burden on companies If staff choose to enrol before the three month period then companies will have to make contributions
