Making Computers Talk Ian H. Witten,1986 [Making Computers Talk](#) Ian H. Witten,1986 [Information Sources in Information Technology](#) David Haynes,2013-02-07 The aim of each volume of this series Guides to Information Sources is to reduce the time which needs to be spent on patient searching and to recommend the best starting point and sources most likely to yield the desired information The criteria for selection provide a way into a subject to those new to the field and assists in identifying major new or possibly unexplored sources to those who already have some acquaintance with it The series attempts to achieve evaluation through a careful selection of sources and through the comments provided on those sources **CSCW and Artificial Intelligence** John H. Connolly,Ernest A. Edmonds,2012-12-06 Computing despite the relative brevity of its history has already evolved into a subject in which a fairly large number of subdisciplines can be identified Moreover there has been a noticeable tendency for the different branches of the subject each to develop its own intellectual culture tradition and momentum This is not of course to suggest that any individual subdiscipline has become a watertight compartment or that developments in one branch of the subject have tended to take place in total isolation from developments in other related areas Nevertheless it does mean that a deliberate effort is required in order to bring different subdisciplines together in a fruitful and beneficial manner Artificial Intelligence AI and Computer Supported Cooperative Work CSCW jointly constitute a good example of two branches of computing that have emerged separately and given rise to largely distinct research communities and initiatives On the one hand the history of AI can be traced back to the 1950s the term II Artificial Intelligence being generally attributed to John McCarthy who first used it in print in 1956 Computer Supported Cooperative Work on the other hand is a term of more recent coinage having been devised by Irene Greif and Paul Cashman in 1984 [The Conversational Interface](#) Michael McTear,Zoraida Callejas,David Griol,2016-05-19 This book provides a comprehensive introduction to the conversational interface which is becoming the main mode of interaction with virtual personal assistants smart devices various types of wearable and social robots The book consists of four parts Part I presents the background to conversational interfaces examining past and present work on spoken language interaction with computers Part II covers the various technologies that are required to build a conversational interface along with practical chapters and exercises using open source tools Part III looks at interactions with smart devices wearables and robots and discusses the role of emotion and personality in the conversational interface Part IV examines methods for evaluating conversational interfaces and discusses future directions *Encyclopedia of Library and Information Science* Allen Kent,1989-09-26 The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes This thorough reference set written by 1300 eminent international experts offers librarians information computer scientists bibliographers documentalists systems analysts and students convenient access to the techniques and tools of both library and information science Impeccably researched cross referenced alphabetized by subject
