**History and Context in Comparative Public Policy** Douglas E. Ashford, 2010-11-23 Douglas E Ashford joins a growing number of scholars who have questioned the behavioralist assumptions of much policy science The essays in this volume show why policy analysis cannot be confined to prevailing methods of social science Policy making behavior involves historical contextual and philosophical factors that also raise critical questions about the concepts and theory of the discipline Ashford asks difficult questions about the contextual conjunctural and unintentional circumstances that affect actual decision making His bridging essays summarize opposing viewpoints and conflicting interpretations to help form a new agenda for comparative policy analysis

**Agency and Transformation** Nick Hopwood, Annalisa Sannino, 2023-11-30 Understanding and promoting agency are crucial to addressing urgent social problems of our time Through agency we can take transformative steps toward the future that ought to be This book shows how contemporary conceptualizations from cultural historical activity theory can inform research and practice that fosters positive change At the core of this book s novel approach to agency and transformation are three motifs motives mediation and motion These take inspiration from the original work of Vygotsky and subsequent generations of scholarship enabling us to understand agency in ways that recognize the social and cultural aspects of agency without losing sight of individuals contributions to changing their own lives and the lives of others Referring to connections between learning pedagogy and agency the chapters address power freedom and the future in contexts including adolescence school exclusion children s activism Indigenous communities environmental activism homelessness childbirth and young people during the COVID 19 pandemic

**The Bonds of Trade** Mika Kallioinen, 2012-11-16 Pre modern long distance trade was conducted in a highly complex and uncertain environment Aside from the lack of personal security trade was characterized by slow communication asymmetric information and limited contract enforceability There was no state in the modern sense to protect merchants Despite these overwhelming problems trade and even overseas trade flourished in medieval and early modern Europe This book explores this paradox how could trade thrive and the economy expand under uncertainties of many kinds Over the past two or three decades enormous advances have been made in explaining how institutions support the economy This book contributes to the intense discussion about institutions and institutional change It builds on the careful examination of long distance trade in the Baltic Sea region over a long period of time and presents a new method to identify past institutions It challenges previous attempts to explain the pre modern expansion of trade by institutions that governed intra group relations Mika Kallioinen argues that the fundamental problem of institutional development was how to create institutions that could advance a regularity of behavior

between a large number of distant communities and between merchants who did not necessarily know one another. The question was how to provide security and enhance trust when trading crossed the geographical, cultural and political boundaries that separated communities. This book extends the limits of our understanding of such inter-community institutions and their implications for later economic development.

**Yorùbá Elites and Ethnic Politics in Nigeria** Wale Adebani, 2014-03-31. Yorùbá Elites and Ethnic Politics in Nigeria investigates the dynamics and challenges of ethnicity and elite politics in Nigeria, Africa's largest democracy. Wale Adebani demonstrates how the corporate agency of the elite transformed the modern history and politics of one of Africa's largest ethnic groups, the Yorùbá. The argument is organized around the ideas and cultural representations of Ife, the central signifier of modern Yorùbá culture. Through the narration and analysis of material, non-material and interactional phenomena such as political party and ethnic group organization, cultural politics, democratic struggle, personal ambitions, group solidarity, death, memory and commemoration, this book examines the foundations of the legitimacy of the Yorùbá political elite. Using historical sociology and ethnographic research, Adebani takes readers into the hitherto unexplored undercurrents of one of the most powerful and progressive elite groups in Africa, tracing its internal and external struggles for power.

*The Mobilization and Demobilization of Middle-Class Revolt* Daniel Ozarow, 2019-03-20. Adopting Argentina's popular uprisings against neoliberalism, including the 2001-02 rebellion and subsequent mass protests, as a case study, *The Mobilization and Demobilization of Middle-Class Revolt* analyzes two decades of longitudinal research (1995-2018) including World Bank and Latinobarómetro household survey data along with participant interviews to explore why nonpolitically active middle-class citizens engage in radical protest movements and why they eventually demobilize. In particular, it asks how do they become politicized and resist economic and political crises along with their own hardship. Theoretically informed by Gramsci's notions of hegemony, ideology and class consciousness, Ozarow posits that to affect profound and lasting social change, multisectoral alliances and sustainable mobilizing vehicles are required to maintain radical progressive movements beyond periods of crisis. With the Argentinian revolt understood to be the ideological forerunner to the autonomist-inspired uprisings which later emerged, comparisons are drawn with experiences in the USA, Spain, Greece, UK, Iceland and the Middle East, as well as 1990s contexts in South Africa and Russia. Such a comparative analysis helps understand how contextual factors shape distinctive struggling middle-class citizen responses to external shocks. This book will be of immense value to students, activists and theorists of social change in North America, Europe and globally.

weaken the cause of public health by weakening the compliance of people with state mandated non pharmaceutical interventions including and especially physical distancing rules and encouraging vaccine hesitancy Secondly Creaven examines how interstate competition and imperial politics have undermined an effective global policy response to the COVID 19 pandemic Policy failure with regard to the management of the pandemic is interpreted as being rooted in the dominance of neoliberal ideology and governance in the politics of international relations particularly in the politics of the leading state actors by protecting corporate interests at the expense of public health and in the constraints imposed on state actors by the competitive dynamic of multinational capitalism in the global age Modernity and the Pandemic will appeal to scholars in the humanities and social sciences with interests in neoliberalism and its social cultural and epidemiological impacts
