Making Managers In Universities And Colleges:

Making Managers In Universities And Colleges Prichard, Craig, 2000-06-01 This book provides an alternative means of discussing the development and significance of managers and management in universities and colleges

Making Managers in Universities and Colleges Craig Prichard, 2000-06-16 This book provides an alternative means of discussing the development and significance of managers and management in universities and colleges It is particularly concerned with the way managing involves the development of different ways of talking acting and relating to people at work Yet this is often difficult and variably successful as it confronts often strong professional and occupational work identities and cultures The book provides a detailed look at the manager in contemporary further and higher education in Britain as post compulsory education has been required to operate on a more commercial basis and universities and colleges are increasingly regarded as small to medium sized enterprises It draws upon interviews with more than 70 senior post holders It explores for example the work of the traditional university vice chancellor who came to see himself as the new chief executive schooled himself in the works of international management gurus Henry Mintzberg and Tom Peters and engaged his 3000 staff in the virtues of thriving on chaos The result as one seasoned higher education observer has noted was 18 months of misery for university personnel It tells the story of the professor of material science who came to see himself as small businessman responsible for maintaining a 2 million a year departmental turnover But at the same time he considered this new identity to be constantly hamstrung by the bureaucratic centralism of his university It tells the stories of senior women administrators who empowered by their appointment as managers challenged the deeply embedded paternalism of their senior academic colleagues And it tells the stories of numerous heads of department and sections repositioned as managers in the new marketized further education who have struggled to re imagine students as funding units and colleagues as their staff Craig Prichard provides a highly nuanced theoretically sophisticated and critically informed account of the repositioning of senior university and college academics as managers This is important reading for those interested in post compulsory education public sector management and the sociology of work and education and of course for university and college managers themselves

Making Managers in Canada, 1945-1995 Jason Russell, 2018-06-14 Management education and training was a key influence on Canadian capital and labour in the post World War II decades however it has been the subject of comparatively little academic inquiry In many ways historians have frequently learned about management behavior in unionized workplaces by examining labor management relations The management experience has thus often been seen through the eyes of rank and file workers rather than from the perspective of managers themselves This book discusses how managers were trained and educated in Canada in the years following the Second World War Making Managers in Canada 1945 1995 seeks to shed light on the experience of workers who have not received much attention in business history managers This book approaches management training from both institutional and social history perspectives Drawing from

community colleges universities and companies in British Columbia Ontario and Qu bec this book reveals the nature of management education and training in English and French Canada It integrates institutional analysis and examines how factors such as gender and social class shaped the development of Canadian management in the post war years and illustrates the various international influences on Canadian management education Strategic Management in Schools and Colleges David Middlewood,Jacky Lumby,1998-04-28 This book is helpful in providing a survey of where education has reached in strategic planning in theory and practice Helpfully case studies are scattered throughout so readers can compare themselves with other schools and pick up do and don t tips Management in Education The strategies presented here are quite useful to provide future directions not only to the managers but also to the planners and trainers Journal of Education Planning and Administration This book examines the issue of strategic management in schools and colleges The contributors present an overview of theory in order to enhance management practice in education and articulate good practice on the basis of evidence in education settings The ideas presented here are derived from international research and practice and apply to all phases of education with the emphasis on using the findings to improve practice in schools and colleges **The Changing Dynamics of Higher Education Middle Management** V. Lynn Meek,Leo Goedegebuure,Rui Santiago,Teresa Carvalho,2010-07-16 Known as either soft or hard managerialism new managerialism or new public management this new narrative has irrespective of moniker permeated the institutions of higher education almost everywhere Taking this as its context this volume is founded on a comprehensive international comparative analysis of the evolving role of middle level academic managers deans heads of department and their equivalents The chapters address key questions that will determine the future of academe have the imperatives of management theory caused a realignment of the values and expectations of middle level academic managers In what way do the new expectations placed on this group shape the academic profession as a whole And whose interests do middle level academic managers represent Based on material presented at one of the high level Douro Seminars on research into tertiary education this volume systematically combines theoretical views with empirical analysis It argues that managerialist pressure has resulted in changes in the way academic performance is measured There has been a shift in criteria away from research reputation teaching and scholarship to the measurement of performance based upon management capacities This has given middle level academic managers a pivotal role halfway between the predilections of high level decision makers and the maintenance of academic values and control The enhanced expectations and more defined functions of middle level academic managers are in clear contrast to earlier times when the position was considered a public spirited rite of passage for career minded academics Despite this the contributors to this book believe that the middle level managers in the ten countries examined are neither corporate lackeys nor champions of academe It is becoming increasingly clear that the ability of organisations to achieve their aims is largely dependent on the skill and dedication of middle managers Past studies of organisational dynamics have been preoccupied with the executive

level of management This text which will be of great interest to researchers and policy makers alike attempts to redress the balance
