Making Medical History The Life And Times Of Henry E Sigerist:

Making Medical History Elizabeth Fee, Theodore M. Brown, 2021 In the first half of this century Henry Ernest Sigerist was widely regarded as the world's leading historian of medicine. A brilliant teacher and lecturer, Sigerist made medical history exciting and relevant for a whole generation of young physicians, medical students, historians, and the general public. A Marxist sympathizer and advocate of socialized medicine, he also had an enormous and controversial influence on the medical politics of his time. In *Making Medical History*, historians Elizabeth Fee and Theodore M. Brown bring together individuals from various disciplines, many of whom knew Henry Sigerist, all of whom help to illuminate why thirty-five years after his death he continues to be revered by many public health professionals and medical historians.

Medical History Ian Miller, 2018-09-19 This introductory textbook presents medical history as a theoretically rich discipline, one that constantly engages with major social questions about ethics, bodies, state, power, disease, public health, and mental disorder. Providing both instructors and students with an account of the changing nature of medical history research since it first emerged as a distinct discipline in 19th-century Germany, this essential guide covers the theoretical development of medical history and evaluates the various approaches adopted by doctors, historians, and sociologists. Synthesizing historiographical material ranging from the 19th to 21st centuries, this is an ideal resource for postgraduate students from History and History of Medicine degrees taking courses on historiography, the theory of history, and medical history.

Locating Medical History Frank Huisman, John Harley Warner, 2006-10-31 The issues constituting the history of medicine are consequential: how societies organize health care, how individuals or states relate to sickness, how we understand our own identity and agency as sufferers or healers. In *Locating Medical History: The Stories and Their Meanings*, Frank Huisman, John Harley Warner, and other eminent historians explore and reflect on a field that accommodates a remarkable diversity of practitioners and approaches. At a time when medical history is facing profound choices about its future, these scholars explore the discipline in the distant and recent past in order to rethink its missions and methods today. They discuss such issues as the periodic estrangement of medical history from medicine, the influence of Foucault on the writing of medical history, and the shifts from social to cultural history, and back again. Chapters explore the early history of the field, its transformations since the 1970s, and its prospects for the future. With diverse constituencies, a multiplicity of approaches, styles, and aims is both expected and desired. This volume locates medical history within itself and within larger historiographic trends to provide a springboard for discussions about what the history of medicine should be and what aims it should serve.
