**Standards** Lawrence Busch, 2013-08-16 An investigation into standards, the invisible infrastructures of our technical, moral, social, and physical worlds. Standards are the means by which we construct realities. There are established standards for professional accreditation, the environment, consumer products, animal welfare, the acceptable stress for highway bridges, healthcare, education for almost everything. We are surrounded by a vast array of standards, many of which we take for granted but each of which has been and continues to be the subject of intense negotiation. In this book, Lawrence Busch investigates standards as recipes for reality. Standards, he argues, shape not only the physical world around us but also our social lives and even our selves. Busch shows how standards are intimately connected to power that they often serve to empower some and disempower others. He outlines the history of formal standards and describes how modern science came to be associated with the moral, technical project of standardization of both people and things. Busch suggests guidelines for developing fair, equitable, and effective standards. Taking a uniquely integrated and comprehensive view of the subject, Busch shows how standards for people and things are inextricably linked, how standards are always layered, even if often addressed serially, and how standards are simultaneously technical, social, moral, legal, and ontological devices.

**Language and Hegemony in Gramsci** Peter Ives, 2004-07-20 Language and Hegemony in Gramsci introduces Gramsci's social and political thought through his writings on language. It shows how his focus on language illuminates his central ideas such as hegemony, organic and traditional intellectuals, passive revolution, civil society, and subalternity. Peter Ives explores Gramsci's concern with language from his university studies in linguistics to his last prison notebook. Hegemony has been seen as Gramsci's most important contribution, but without knowledge of its linguistic roots, it is often misunderstood. This book places Gramsci's ideas within the linguistically influenced social theory of the twentieth century. It summarizes some of the major ideas of Ferdinand de Saussure, Ludwig Wittgenstein, language philosophy, and post-structuralism in relation to Gramsci's position. By paying great attention to the linguistic underpinnings of Gramsci's Marxism,

Language and Hegemony in Gramsci shows how his theorization of power language and politics address issues raised by post modernism and the work of Michel Foucault Jacques Derrida Chantal Mouffe and Ernesto Laclau     The Eclipse of Morality  
Lawrence Busch, Using the works of Bacon Hobbes and Adam Smith as well as historical examples drawn from the last two centuries Busch shows how the ideas initially proposed by these thinkers became reified as scientism statism and marketism systems of belief that a single mode of ordering could solve the riddle of society and thereby supplant moral responsibility Busch contrasts this approach with concrete examples of successful attempts to extend democracy into these areas to create multiple orderings so that moral responsibility is neither crushingly heavy on individuals nor unbearably light on society
