**Making Human Beings Human** Urie Bronfenbrenner, 2005 *Making Human Beings Human Bioecological Perspectives on Human Development* is a landmark collection that traces and summarizes Urie Bronfenbrenner's thoughts on the bioecological theory of human development and recommends avenues for future research. The majority of the twenty-three retrospective articles were written by Bronfenbrenner while some were written with colleagues in his own or related fields over the course of six decades. The book's articles document the domain of inquiry that has emerged gradually over many years and has now acquired a title of its own: the bioecological theory of human development. *Making Human Beings Human* is a culminating work by a prominent figure in the field of human development and will help to shape the future of the field.

This book presents a comprehensive introduction to Bronfenbrenner's model of development in reference to early childhood education. It draws on practice-based research to identify and animate key elements of the model impacting on early educational pedagogy and practice. This new and revised second edition identifies and explores the key elements of Bronfenbrenner's model by referring to contemporary understandings of how children learn. It also includes a new chapter which considers repositioning early childhood education settings as interactive relational spaces and provides a broader focus on the concept of transitional experiences in children's daily lives. Along with new content on leadership and associated roles and practices in early childhood education, this book illustrates how Bronfenbrenner's model can help bring quality to early learning environments and show how it can be incorporated into daily work with young children through vignettes, case studies, and examples of good practice. *Introducing Bronfenbrenner* serves as an ideal read for professionals around the world working with children in early childhood settings and students training to become early childhood professionals at degree level on undergraduate programmes as part of vocational training or as part of continuous professional development. **Understanding and Using Educational Theories** Karl Aubrey, Alison Riley, 2015-11-28 I expect that this book will equip and inspire students to engage first hand with the texts of these creative and influential educational writers. **Doing without Free Will** Ursula Goldenbaum, Christopher Kluz, 2015-10-08 Doing without Free Will Spinoza and Contemporary Moral Problems introduces Spinoza into the contemporary discussion on free will and on moral problems surrounding this discussion Traditional Western moral philosophy for the most part has been built on the assumption of free will as a special human capacity to freely choose actions without being determined in that choice This idea draws increasing critique fueled recently especially by the ever new findings of neuroscience But how can we develop a moral philosophy without free will Spinoza faced a similar challenge when writing his Ethics during the rise of modern science and its deterministic model of nature and for this reason has much to offer the current discussion Not only does he provide a foundation for understanding moral responsibility without free will he also provides an explanation and solution to the classical problem of akrasia precisely because he argues the will is not free He worked out an entirely new system of moral philosophy that can help resolve the meta ethical dilemma between absolutism and relativism showing how moral values evolve naturally within society Despite denying the traditional God like power of free will Spinoza developed a robust concept of freedom one that is distinctly human and viable today His modernity comes to light when we look at his answers to the much discussed questions whether it is possible or even desirable to develop objective instead of reactive attitudes toward our fellow human beings His answers perhaps surprisingly resemble positions held by some contemporary philosophers
