**Stubborn Roots** Prudence L. Carter,2012-04-26 There are simply not enough texts that look comparatively at the two foremost experiments with questions of race culture and and class in the English speaking world the United States and South Africa Prudence Carter s work is simultaneously scholarly and compassionate It helps us see in these two benighted but globally important societies how easily things break but also how well when structures are in place and when human agency takes flight individuals and the groups to which they belong flourish and grow Crain Soudien Deputy Vice Chancellor University of Cape Town

*Associate Training Manual* Michael A. Gray M.A.E.D,2016-12-19 Your

knowledge of police ethics or lack thereof determines your experience Every sworn officer knows or at least should know by now that they live in a glass jar Friends relatives neighbors and strangers watch every move that law enforcement officers make both on and off duty The fact is that the public scrutinizes police officers more than most other professions either because they're cynical or hope to catch them screwing up or because they're hopeful and are looking for a good example and a strong leader In either case it's up to the officer or civil service worker to be above reproach in both his public and private life The major difference between most sworn officers or civil service workers and extremely successful officers or civil workers is the gap between what they know and what they do Both groups have about the same knowledge base Extremely successful officers and civil service workers are just better at doing what they should be doing I worked as a special deputy sheriff early in my young life and there were times I lost my temper to the point where I wanted to cross ethical boundaries I wrote this powerful high impact workbook to help fellow officers by educating them in police ethics so that they won't become a victim of poor decision making placed in the limelight of shame and made the poster child for law enforcement ethical dilemmas Using this ethical workbook in your organization will show your employees you're serious about their professional growth and achieving critical ethical goals and objectives This ethics in law enforcement workbook allows you to train entire police departments for less than the cost of traditional public seminars or other training options Give your officers and civil service workers the skills knowledge and confidence they need to meet tough workplace challenges while on patrol or while working in a civil service position This workbook will help them realize their full potential and perform at their peak and provide them with the tips and techniques they will need to stay calm and productive in any situation

**The Channels of Student Activism** Amy J. Binder, Jeffrey L. Kidder, 2022-05-16 An eye opening analysis of collegiate activism and its effects on the divisions in contemporary American politics The past six years have been marked by a contentious political atmosphere that has touched every arena of public life including higher education Though most college campuses are considered ideologically progressive how can it be that the right has been so successful in mobilizing young people even in these environments As Amy J. Binder and Jeffrey L. Kidder show in this surprising analysis of the relationship between political activism on college campuses and the broader US political landscape while liberal students often outnumber conservatives on college campuses liberal campus organizing remains removed from national institutions that effectively engage students after graduation And though they are usually in the minority conservative student groups have strong ties to national right leaning organizations which provide funds and expertise as well as job opportunities and avenues for involvement after graduation Though the left is more prominent on campus the right has built a much more effective system for mobilizing ongoing engagement What's more the conservative college ecosystem has worked to increase the number of political provocations on campus and lower the public's trust in higher education In analyzing collegiate activism from the left right and center **The Channels of Student Activism** shows exactly how politically engaged college students are channeled into two

distinct forms of mobilization and why that has profound consequences for the future of American politics **Richard Rorty** Neil Gross, Professor of Sociology Neil Gross, 2010-10 On his death in 2007 Richard Rorty was heralded by the New York Times as one of the world's most influential contemporary thinkers Controversial on the left and the right for his critiques of objectivity and political radicalism Rorty experienced a renown denied to all but a handful of living philosophers In this masterly biography Neil **Routledge International Handbook of Diversity Studies** Steven Vertovec, 2014-11-20 In recent years the concept of diversity has gained a leading place in academic thought business practice and public policy worldwide Although variously used diversity tends to refer to patterns of social difference in terms of certain key categories Today the foremost categories shaping discourses and policies of diversity include race ethnicity religion gender disability sexuality and age further important notions include class language locality lifestyle and legal status The Routledge Handbook of Diversity Studies will examine a range of such concepts along with historical and contemporary cases concerning social and political dynamics surrounding them With contributions by experts spanning Sociology Anthropology Political Science History and Geography the Handbook will be a key resource for students social scientists and professionals It will represent a landmark volume within a field that has become and will continue to be one of the most significant global topics of concern throughout the twenty first century **An Ethical Approach to Ending Recidivism** Michael A. Gray M.A.Ed., 2015-12-28 Law enforcement in a free society must strike a delicate balance between protecting individual rights to professional service especially from government sponsored agencies and the society's interest in professional ethical decision making by law enforcement professionals Often this is seen as one between a principal defense of civil rights and a mere Unitarian interest in improving the continuity of customer service There is no certain place to fix the line between appropriate and Impermissible correctional officer and custody staff professional conduct What is most conspicuous about this area of ethics in Department of corrections is the lack of controlling standards for defining the roles of correctional officers and custody staff The purpose of the correctional Leadership and Ethics Training is to prevent breaches of the peace enforce the laws directives and regulations which govern the correctional institutions to protect its employees the facilities its assets and the nation's currency which function in synchronization Trainees will be able to consult a menu of techniques and be encouraged to contribute ideas of their own *Managing Madness in the Community* Kerry Michael Dobransky, 2014-03-27 While mental illness and mental health care are increasingly recognized and accepted in today's society awareness of the most severely mentally ill as well as those who care for them is still dominated by stereotypes *Managing Madness in the Community* dispels the myth Readers will see how treatment options often depend on the social status race and gender of both clients and carers how ideas in the field of mental health care conflicting priorities and approaches actually affect what happens on the ground and how amid the competing demands of clients and families government agencies bureaucrats and advocates the fragmented American mental health system really works or doesn't In the wake of movies like *One Flew Over the Cuckoo's*

Nest and Shutter Island most people picture the severely or chronically mentally ill being treated in cold remote and forbidding facilities But the reality is very different Today the majority of deeply troubled mental patients get treatment in nonprofit community organizations And it is to two such organizations in the Midwest that this study looks for answers Drawing upon a wealth of unique evidence fifteen months of ethnographic observations 91 interviews with clients and workers and a range of documents *Managing Madness in the Community* lays bare the sometimes disturbing nature and effects of our overly complex and disconnected mental health system Kerry Michael Dobransky examines the practical strategies organizations and their clients use to manage the often conflicting demands of a host of constituencies laws and regulations Bringing to light the challenges confronting patients and staff of the community based institutions that bear the brunt of caring for the mentally ill his book provides a useful broad framework that will help researchers and policymakers understand the key forces influencing the mental health services system today *Emancipatory Human Rights and the University* Felisa Tibbitts, André Keet, 2023-08-25 This volume explores the application of human rights to higher education through a critical lens Combining theoretical and applied perspectives it asks what a human rights framework grounded in liberation and justice can offer to ways of working and teaching practices in higher education Human rights in this edited compilation call for continuous critical engagements around the higher education transformation project The book recognizes human rights simultaneously as law values and emancipatory vision It showcases global north and global south perspectives and encourages a dialogue between the human rights approach and other approaches to higher education transformation such as decolonialization anti racism diversity and inclusion and intersectionality Individual chapters featuring a range of case studies written from global south and north perspectives critically examine higher education practices linked with human rights ranging from curricular practices to student activism and community partnerships The critical space of the university and its role in the transformation of society is therefore viewed in multi dimensional ways Underlining the value of applying human rights as a framework in understanding and designing higher education transformation the book will be of great interest to scholars researchers and post graduate students in the fields of the sociology of education human rights education higher education and social justice education *Reconstructing the University* David John Frank, Jay Gabler, 2006 Detailed study of transformations in the teaching and research priorities of universities worldwide examining how these changes correspond to globally institutionalized understandings of reality *Bathroom Battlegrounds* Alexander K. Davis, 2020-01-28 Today s debates about transgender inclusion and public restrooms may seem unmistakably contemporary but they have a surprisingly long and storied history in the United States one that concerns more than mere potty politics Alexander K Davis takes readers behind the scenes of two hundred years worth of conflicts over the existence separation and equity of gendered public restrooms documenting at each step how bathrooms have been entangled with bigger cultural matters the importance of the public good the reach of institutional inclusion the nature of gender difference and above all

the myriad privileges of social status Chronicling the debut of nineteenth century comfort stations twentieth century mandates requiring equal but separate men s and women s rooms and twenty first century uproar over laws like North Carolina s bathroom bill Davis reveals how public restrooms are far from marginal or unimportant social spaces Instead they are and always have been consequential sites in which ideology institutions and inequality collide *Human Rights, Diversity, and National Identity* Patricia E. Bromley, 2011 Fundamental world changes that simultaneously undermine a nation state s charisma and promote the rise of a supra national system have wide ranging effects upon national states within a modern global society My dissertation empirically examines the effects of social and cultural globalization on systems of mass schooling which are central institutions in every country Globally primary and secondary education initially emerged as the premier tool for nation states to create a unified national citizenry loyal to their country and socialized into a common cultural tradition I examine the extent to which this original nationalizing purpose of schooling is challenged by the increased emphases on universal human rights and diversity in civic education The analyses consist of two sections Hierarchical linear models are used to analyze a unique primary data source of 521 social science textbooks from 74 countries during the period 1970 2008 These findings show a worldwide increase in emphasis on human rights and increases in discussions of diversity in well established liberal democracies Cross national quantitative analyses are complemented by a qualitative case study of social science curricula in British Columbia BC which examines nation building within a context of strong emphasis on diversity and human rights The BC study utilizes currently approved high school citizenship education textbooks as well as older textbooks dating back to 1871 It also draws on a selection of historical documents including Ministry of Education reports curricular frameworks and high school exit exams Process wise I find the incorporation of human rights and diversity reflects macro level changes in national and global society Content wise I find four main approaches to reconciling ideas of human rights and diversity with national identity 1 framing human rights and multiculturalism as part of national identity 2 using pedagogical approaches that promote multiple perspectives and individual agency 3 celebrating social and scientific figures and accomplishments as the source of national pride and 4 drawing on exogenous sources to affirm state legitimacy This study is one of the first to theorize that civic education worldwide is moving away from a national focus and to provide empirical evidence of this trend A key implication is that educational systems are being repurposed from their original goal of constructing a unitary national citizenry to a new view emphasizing human diversity and equality in a globally interconnected world Further students are increasingly taught that the global civil society and non state actors are important and legitimate agents of social change Over Ten Million Served Michelle A. Massé, Katie J. Hogan, 2012-02-01 All tenured and tenure track faculty know the trinity of promotion and tenure criteria research teaching and service While teaching and research are relatively well defined areas of institutional focus and evaluation service work is rarely tabulated or analyzed as a key aspect of higher education s political economy Instead service silent and invisible coexists with the formal official economy of many

institutions just as women's unrecognized domestic labor props up the formal official economies of countries the world over. Over Ten Million Served explores what academic service is and investigates why this labor is often not acknowledged as labor by administrators or even by faculty themselves but is instead relegated to a gendered form of institutional caregiving. By analyzing the actual labor of service particularly for women and racial ethnic and sexual minorities contributors expose the hidden economy of institutional service challenging the feminization of service labor in the academy for both female and male academic laborers.
