Adverbs and Adverbial Adjuncts at the Interfaces Katalin É. Kiss, 2009-05-05 This book clarifies on the basis of mainly Hungarian data basic issues concerning the category adverb the function adverbial and the grammar of adverbial modification It argues for the PP analysis of adverbials and claims that they enter the derivation via left and right adjunction Their merge in position is determined by the interplay of syntactic semantic and prosodic factors The semantically motivated constraints discussed also include a type restriction affecting adverbials semantically incorporated into the verbal predicate an obligatory focus position for scalar adverbs representing negative values of bidirectional scales cooccurrence restrictions between verbs and adverbials involving incompatible subevents etc The order and interpretation of adverbials in the postverbal domain is shown to be affected by such phonologically motivated constraints as the Law of Growing Constituents and by intonation phrase restructuring The shape of the light headed chain
