The Mystery of Space Robert T. Browne, 1919 Mathematics is the biometer of intellectual evolution Hence the determination of the status quo of the intellect at any time can be accomplished most satisfactorily by applying to it the rigorous measure of the mathematical method The intellect has but one true divining rod and that is mathematics By day and by night it points the way unerringly so long as it leads through materiality but falteringly blindly fatally when that way veers into the territory of vitality and spirituality Wherefore when we have wished to ascertain the real status of the intellect as well as its limitations tendencies possibilities we have turned to its conduct in the field of mathesis where it is least trammelled in its ingressive and egressive motivations because of the natural and easy

accommodation which is offered for intellectual movement Whether there are signs of moribundity or symptomatic evidences of marked growth or of a termination of intellectual regnancy or whatever may be the occasion for the examination no surer index than the mathematical may be found for the purpose Full logical justification is therefore claimed for the choice of mathematical evidences to test the assumption that a new era of conscious mental conquest is opening for the vanguard of humanity and sequently for the human family
