Myth Of Nations The Medieval Origins Of Europe:

The Myth of Nations Patrick J. Geary, 2002 Modern day Europeans by the millions proudly trace back their national identities to the Celts Franks Gauls Goths Huns or Serbs or some combination of the various peoples who inhabited traversed or pillaged their continent more than a thousand years ago According to Patrick Geary this is historical nonsense The idea that national character is fixed for all time in a simpler distant past is groundless he argues in this unflinching reconsideration of European nationhood Few of the peoples that many Europeans honor as sharing their sense of nation had comparably homogeneous identities even the Huns he points out were firmly united only under Attila's ten year reign Geary dismantles the nationalist myths about how the nations of Europe were born Through rigorous analysis set in lucid prose he contrasts the myths with the actual history of Europe's transformation between the fourth and ninth centuries the period of grand migrations that nationalists hold dear The nationalist sentiments today increasingly taken for granted in Europe emerged he argues only in the nineteenth century Ironically this phenomenon was kept alive not just by responsive populations but by complicit scholars Ultimately Geary concludes the actual formation of European peoples must be seen as an extended process that began in antiquity and continues in the present The resulting image is a challenge to those who anchor contemporary antagonisms in ancient myths to those who claim that immigration and tolerance toward minorities despoil nationhood As Geary shows such ideologues whether Le Pens who champion the French people born with the baptism of Clovis in 496 or Milosevics who cite early Serbian history to claim rebellious regions know their myths but not their history The Myth of Nations will be intensely debated by all who understood that a history that does not change that reduces the complexities of many centuries to a single eternal moment isn't history at all

minorities despoil nationhood As Geary shows such ideologues whether Le Pens who champion the French people born with the baptism of Clovis in 496 or Milosevics who cite early Serbian history to claim rebellious regions know their myths but not their history

Imagology Manfred Beller, Joseph Theodoor Leerssen, 2007 How do national stereotypes emerge To which extent are they determined by historical or ideological circumstances or else by cultural literary or discursive conventions This first inclusive critical compendium on national characterizations and national cultural or ethnic stereotypes contains 120 articles by 73 contributors Its three parts offer 1 a number of in depth survey articles on ethnic and national images in European literatures and cultures over many centuries 2 an encyclopedic survey of the stereotypes and characterizations traditionally ascribed to various ethnicities and nationalities and 3 a conspectus of relevant concepts in various cultural fields and scholarly disciplines The volume as a whole as well as each of the articles has extensive bibliographies for further critical reading Imagology is intended both for students and for senior scholars facilitating not only a first acquaintance with the historical development typology and poetics of national stereotypes but also a deepening of our understanding and analytical perspective by interdisciplinary and comparative contextualization and extensive cross referencing

Cultural Diversity in the British Middle Ages J. Cohen, 2008-08-04 Through close readings of both familiar and obscure medieval texts the contributors to this volume attempt to read England as a singularly powerful entity within a vast geopolitical network This capacious world can be glimpsed in the cultural flows connecting the Normans of Sicily with the rulers of England or Chaucer with legends arriving from Bohemia It can also be

seen in surprising places in literature as when green children are discovered in twelfth century Yorkshire or when Welsh animals begin to speak of the long history of their land's colonization. The contributors to this volume seek moments of cultural admixture and heterogeneity within texts that have often been assumed to belong to a single national canon, discovering moments when familiar and bounded space erupt into unexpected diversity and infinite realms. When is the Nation? Atsuko Ichijo, Gordana Uzelac, 2005-11-17. This new collection of key authors on nationalism presents the latest thinking on this fundamental aspect of Politics, International Relations and Sociology. John Breuilly, Walker Connor, Steven Grosby, Eric Hobsbawm, Anthony D. Smith and Pierre van den Berghe comprehensively explain and address the key contemporary question in nationalism studies: when is the nation or what point in a nation's history is it born with authority and freshness? Our world is still deeply imbedded in the language and practice of nations and nationalism and they remain central parts in understanding human society. This comparison and contrast of the main approaches reveals their strengths and weaknesses. This new text introduces the main schools of thought with clarity and concision, tackles the most pertinent questions in nationalism, delivers both theoretical and empirical perspectives, uses an innovative new interactive debate format with questions and answers, presents key case studies bringing theory to life. The inclusion of case studies gives the reader fresh insight into specific nations and national groups including The United States, Greece, England and Fiji. The accessible debate format puts main theories and thinkers to the test, enabling the reader to interact with the issues directly. This unique volume is an invaluable resource for students and scholars of nationalism, ethnicity and global conflict.

Ancestors and Relatives Eviatar Zerubavel, 2011-10-15. Genealogy has long been one of humanity's greatest obsessions. But with the rise of genetics and increasing media attention to it through programs like *Who Do You Think You Are* and *Faces of America*, we are now told that genetic markers can definitively tell us who we are and where we came from. The problem, writes Eviatar Zerubavel, is that biology does not provide us with the full picture. After all, he asks, why do we consider Barack Obama black even though his mother was white? Why did the Nazis believe that unions of Germans and Jews would produce Jews rather than Germans? In this provocative book, he offers a fresh understanding of relatedness, showing that its social logic sometimes overrides the biological reality it supposedly reflects. In fact, rather than just biological facts, social traditions of remembering and classifying shape the way we trace our ancestors, identify our relatives and delineate families, ethnic groups, nations and species. Furthermore, genealogies are more than mere records of history. Drawing on a wide range of evidence, Zerubavel introduces such concepts as braiding, clipping, pasting, lumping, splitting, stretching and pruning to shed light on how we manipulate genealogies to accommodate personal and collective agendas of inclusion and exclusion. Rather than simply find out who our ancestors were and identify our relatives, we actually construct the genealogical narratives that make them our ancestors and relatives. An eye-opening re-examination of our very notion of relatedness, *Ancestors and Relatives* offers a new way of understanding family, ethnicity, nationhood, race and humanity.

The SAGE Handbook of Nations and Nationalism Gerard Delanty, Krishan Kumar, 2006-06-14 With its list of distinguished contributors and its wide range of topics the handbook is surely destined to become an invaluable resource for all serious students of nationalism Michael Billig Professor of Social Sciences at Loughborough University and author of *Banal Nationalism* SAGE 1995 The persistence some would say revival of nationalism across the recent history of modernity in particular the past two decades has taken many scholars in the social sciences by surprise In response interest in the analysis of nationalism has increased and given rise to a great variety of new angles under which to study the phenomenon What was missing in the cacophony of voices addressing nationalism was a volume that brought them together and confronted them with each other This handbook does just that It deserves particular praise for the wide range of approaches and topics included and for the systematic attempt at studying nationalism as a phenomenon of our time not a remnant from the past Peter Wagner Professor of Social and Political Theory European University Institute and Professor of Sociology University of Warwick For students concerned with the contemporary study of nationalism this will be an invaluable publication The three fold division into approaches themes and cases is a very solid and sensible one The editors have commissioned essays from leading scholars in the field and this handbook provides the best single volume overview of contemporary nationalism John Breuilly Professor of Nationalism and Ethnicity London School of Economics Nationalism has long excited debate in political social and cultural theory and remains a key field of enquiry among historians anthropologists sociologists as well as political scientists It is also one of the critical media issues of our time There are however surprisingly few volumes that bring together the best of this intellectual diversity into one collection This Handbook gives readers a critical survey of the latest theories and debates and provides a glimpse of the issues that will shape their future Its three sections guide the reader through the theoretical approaches to this field of study its major themes from modernity to memory migration and genocide and the diversity of nationalisms found around the globe The overall aim of this Handbook is to relate theories and debates within and across a range of disciplines illuminate themes and issues of central importance in both historical and contemporary contexts and show how nationalism has impacted upon and interacted with other political and social forms and forces This book provides a much needed resource for scholars in international relations political science social theory and sociology

Medievalism, Multilingualism, and Chaucer M. Davidson, 2009-12-21 In new readings of medieval language attitudes and identities this book concludes that multilingualism informed masculinist discourses which were aligned against the vernacular sentiment traditionally attributed to Langland and Chaucer *Empires of Faith* Peter Sarris, 2011-10-27 Drawing upon the latest historical and archaeological research Dr Peter Sarris provides a panoramic account of the history of Europe the Mediterranean and the Near East from the fall of Rome to the rise of Islam The formation of a new social and economic order in western Europe in the fifth sixth and seventh centuries and the ascendancy across the West of a new culture of military lordship are placed firmly in the context of on going connections and influence radiating outwards from

the surviving Eastern Roman Empire ruled from the great imperial capital of Constantinople The East Roman or Byzantine Emperor Justinian s attempts to revive imperial fortunes restore the empire s power in the West and face down Constantinople s great superpower rival the Sasanian Empire of Persia are charted as too are the ways in which the escalating warfare between Rome and Persia paved the way for the development of new concepts of holy war the emergence of Islam and the Arab conquests of the Near East Processes of religious and cultural change are explained through examination of social economic and military upheavals and the formation of early medieval European society is placed in a broader context of changes that swept across the world of Eurasia from Manchuria to the Rhine Warfare and plague holy men and kings emperors shahs caliphs and peasants all play their part in a compelling narrative suited to specialist student and general readership alike
