Myth Of The Powerless State

Linda Weiss

Myth Of The Powerless State:

The Myth of the Powerless State Linda Weiss, 2018-05-31 Conventional wisdom argues that the integration of the world economy is making national governments less powerful but Linda Weiss disagrees. In an era when global society and the transnational market are trendy concepts, she suggests that state capacities for domestic transformative strategies provide a competitive advantage. Some of the most successful economies rely on state-informed and state-embedded institutions for governing the economy. In fact, she contends, the strength of external economic pressures is largely determined domestically, and the effect of such pressures varies with the strength of domestic institutions. Weiss analyzes the sources and varieties of state capacity for governing industrial transformation in contemporary cases: the unraveling of Sweden's distributive model of adjustment, the evolution of developmental states in Northeast Asia, and the parallel strengths of the German and Japanese systems of industrial coordination. Her comparative perspective allows her to show how different types of state capacity affect industrial vitality and domestic adjustment to global forces. As economic integration proceeds, she concludes, state capabilities will matter more rather than less in fostering social well-being and the creation of wealth.

Questioning Globalization Kavaljit Singh, 2005-10 This volume offers a clear presentation of the big questions about globalization.

The Myth of the Powerless State Linda Weiss, 1998 It is widely claimed that as the integration of the world economy advances, national governments are becoming less relevant, losing their powers not only to influence macroeconomic outcomes and to implement social programmes but to determine strategies for managing the industrial economy. In the face of such claims of state powerlessness, this book proposes that what lies behind some of the most successful economies today is a series of state-informed and state-embedded institutions for governing the economy. The book's central proposition is that the impact of external economic pressures is to a large degree domestically determined, varying in important measure according to the robustness or weakness of national institutions. This thesis is advanced through an analysis of the sources and varieties of state capacity for governing industrial transformation. Focusing on the unravelling of Sweden's distributive model of adjustment, on the evolution of developmental states in East Asia, as well as on the parallel strengths of the German and Japanese systems of industrial coordination, it is shown how different types of state capacity have developmental, distributive, and dual impact on industrial vitality and domestic adjustment to the international economy. The comparative perspective developed in this study indicates that as world economic integration proceeds, state capabilities will matter more rather than less in fostering social well-being and wealth creation. This book will be essential reading for 2nd and 3rd year undergraduates in comparative politics, political economy, and political sociology, as well as to all those who have an interest in the nature and prospects of the state in the face of changes to the world economy.

The Social Sources of Financial Power Leonard Seabrooke, 2006 A state's financial power is built on the effect its credit policy and tax policies have on ordinary people; this is the key message of Leonard Seabrooke's comparative historical investigation, which turns the spotlight

away from elite financial actors and toward institutions that matter for the majority of citizens Seabrooke suggests that everyday contests between social groups and the state over how the economy should work determine the legitimacy of a state's financial and fiscal system Ideally he believes such contests compel a state to intervene on behalf of people below the median income level leading the state to broaden and deepen its domestic pool of capital while increasing its influence on international finance But to do so Seabrooke asserts a state must first challenge powerful interests that benefit from the concentration of financial wealth Seabrooke's novel constructivist approach is informed by economic sociology and the work of Max Weber This book demonstrates how domestic legitimacy influences the character of international financial orders It will interest all readers concerned with how best to transform state intervention in the economy for the good of the majority

Global Challenges - Local Responses Daniel Fleming, 2006

The Rise and Fall of the Welfare State Asbjørn

Wahl, 2011-11-07 In an age of government imposed austerity and after 30 years of neoliberal restructuring the future of the welfare state looks increasingly uncertain Asbjørn Wahl offers an accessible analysis of the situation across Europe identifies the most important challenges and presents practical proposals for combating the assault on welfare Wahl argues that the welfare state should be seen as the result of a class compromise forged in the 20th century which means that it cannot easily be exported internationally He considers the enormous shifts in power relations and the profound internal changes to the welfare state which have occurred during the neoliberal era pointing to the paradigm shift that the welfare state is going through This is illustrated by the shift from welfare to workfare and increased top down control As well as being a fascinating study in its own right that will appeal to students of economics and politics *The Rise and Fall of the Welfare State* also points to an alternative way forward for the trade union movement based on concrete examples of struggles and alliance building

The Global Economy, National States and the Regulation of Labour Paul Edwards, Tony Elger, 2014-06-03

The implications of globalization for labour are more often asserted than analyzed This collection and its companion volume *Globalization and Patterns of Labour Resistance* edited by Jeremy Waddington seek to remedy this deficiency by presenting contemporary research on the relationship between the globalization of production and the regulation of labour It considers the ways in which national and supra national regimes of labour regulation are being actively reconstructed in the context of the internationalization of production The contributors analyze the implications of changes in different national labour regimes for relations between state capital and labour and for class and gender segmentation and discuss the scope and limits of recent initiatives in the implementation of international labour standards

Liberal Internationalism and the

Decline of the State P. Hammarlund, 2005-03-01 This book provides a critical analysis of the liberal ideas of the decline of the state through a historical comparison It takes special note of the implications of state failure to control economic growth and market exigencies for international relations The book is divided into three sections The first analyzes Cobden Mitrany and Ohmae's empirical claims the second looks at their normative judgements and the third looks at their predictive

assertions It concludes that the three primarily propose normative arguments for less state involvement in economic and international relations but conceal them in empirical and predictive assertions The liberal idea of the decline of the state is more of an ideological statement in response to political social and economic trends than an objective observation of an empirically verifiable fact

Labour and Development in East Asia Kevin Gray, 2014-10-10 The Chinese Communist Party's response to the wave of factory strikes in the early summer of 2010 has raised important questions about the role that labour plays in the transformation of world orders In contrast to previous policies of repression towards labour unrest these recent disputes centring round wages and working conditions have been met with a more permissive response on the part of the state as the CCP ostensibly seeks to facilitate a transition away from a model of political economy based on low road labour relations and export dependence Labour and Development in East Asia shows that such inter linkages between labour geopolitical transformations and states developmental strategies have been much more central to East Asia's development than has commonly been recognised By adopting an explanatory framework of the labour geopolitics development nexus the book theorises and provides an historical analysis of the formation and transformation of the East Asian regional political economy from the end of the Second World War to the present with particular reference to Japan South Korea Taiwan and China This book will be required reading for students and scholars of international relations development studies and comparative politics

Transnational Public Governance M. Warning, 2009-08-13 This book explores the work of transnational bureaucracy networks These networks address global issues by creating rules transnational public law to be incorporated into national legal orders As classical means fail to legitimize such activities this book gives a practical account of viable alternative legitimacy mechanisms
