Mythology Of Dark And Lightthe:

The Darkness Manifesto Johan Eklöf, 2024-02-13 How much light is too much light Satellite pictures show our planet as a brightly glowing orb and in our era of constant illumination light pollution has become a major issue The world's flora and fauna have evolved to operate in the natural cycle of day and night But in the last 150 years we have extended our day and in doing so have forced out the inhabitants of the night and disrupted the circadian rhythms necessary to sustain all living things including ourselves In this well researched and surprisingly lyrical The New Statesman UK book Swedish conservationist Johan Eklöf urges us to appreciate natural darkness its creatures and its unique benefits He ponders the beauties of the night sky traces the errant paths of light drunk moths and the swift dives of keen eyed owls and shows us the bioluminescent creatures of the deepest oceans As a devoted friend of the night Eklöf reveals the startling domino effect of diminishing darkness insects dumbfounded by streetlamps failing to reproduce birds blinded and bewildered by artificial lights and bats starving as they wait in vain for insects that only come out in the dark For humans light induced sleep disturbances impact our hormones and weight and can contribute to mental health problems like chronic stress and depression The streetlamps floodlights and neon signs of cities are altering entire ecosystems and scientists are only just beginning to understand their long term effects The light bulb long the symbol of progress and development needs to be turned off

The Darkness of Light: the Creation Catastrophe B. P. Evans, 2011-07-08 What if this universe was created by someone What if this universe wasn't going according to plan What if the creator was hellbent on wiping out entire races that weren't meant to exist What if one of those races was the human race The Darkness of Light The Creation Catastrophe is the first novel in the six part sci fi mystery Darkness of Light series The main character is Lola Spears a young teenager whose home island is the centre of weird goings on that start happening when alien visitors arrive Lola immediately becomes curious as to what exactly is happening and why Her curiosity leads her down a dangerous path but how will she react when she finds out just why aliens are coming to Earth Will the aliens plan be fulfilled And what exactly is the fate of the human race

Dark Pool of Light: The neuroscience, evolution, and ontology of consciousness Richard Grossinger, 2012 In books like Embryogenesis and Embryos Galaxies and Sentient Beings author Richard Grossinger brought together the subjects of biological embryology and the esoteric process of human consciousness becoming embodied The embryo is the universe writing itself on its own body In Dark Pool of Light his latest creation Grossinger weaves neuroscience based behaviorism and the phenomenology of being and reality together with psychological and psychospiritual views of that single thing which is most difficult to understand or vindicate our own existence In 2008 Grossinger began studying with noted psychic teacher John Friedlander who helped him refine his vision of cerebral and somatic awareness to still subtler levels Dark Pool of Light began unnamed in the journals of my psychic work with John Friedlander says Grossinger not so much a record of actual practices as insights from them and extensions out of them An expansive inquiry into the nature of

consciousness the series examines the tension between the scientific and philosophical and psychic views of the same phenomena and includes field notes and experiential exercises that invite the reader to make their own explorations Dark Pool of Light is divided into three volumes which the author calls movements the allusion to music is apt for the book unfolds in a truly symphonic manner In Volume 1 Grossinger begins with the scientific and philosophical analytical views of reality exploring the science parascience philosophy and psychology of consciousness Covering topics as diverse as current discoveries in neuroscience and the philosophy of the ancient Greeks the book gives a broad overview of the bodies of knowledge concerning the nature of reality and consciousness

Elemental and Ancestral Spirits, Or the Gods and the Glorified Gerald Massey, 2008-11-01 The two primary elements were those of darkness and light Sut was the power of darkness Horus the power of light In one representation the two elements were imaged by means of the black bird of Sut and the white bird or golden hawk of Horus Thus we can identify two elemental powers as old as night and day which are primeval in universal mythology and these two powers or animistic souls were divinized as the two gods Sut and Horus with the two birds of darkness and light the black vulture and the gold hawk depicted back to back as their two representative types or personal totems from Elemental and Ancestral Spirits or The Gods and the Glorified It goes unappreciated by modern Egyptologists but it is embraced by those who savor the concept of a hidden history of humanity and those who approach all human knowledge from the perspective of the esoteric Gerard Massey's massive Ancient Egypt The Light of the World first published in 1907 and the crowning achievement of the self-taught scholar redefines the roots of Christianity via Egypt proposing that Egyptian mythology was the basis for Jewish and Christian beliefs Here Cosimo proudly presents Book 3 of Ancient Egypt in which Massey explains how the original elemental spirits of early humans were transformed into deities and how the concept of a soul developed from animalistic representations of natural forces Peculiar and profound this work will intrigue and delight readers of history religion and mythology British author GERALD MASSEY 1828 1907 published works of poetry spiritualism Shakespearean criticism and theology but his best known works are in the realm of Egyptology including A Book of the Beginnings and The Natural Genesis
