The Globalizations of Organized Labour G. Mykonos, 2005-09-06 Mykonos explores the ways in which organized labour has globalized since 1945 Using two touchstone indicators the extent of cross border integration and the autonomy vis vis the state the book reveals a counterintuitive process network globalization involves a continuing orientation towards the state The book not only seeks to identify organized labour s trajectory on the macro plane but also to provide a more precise meaning of the term globalization as it relates to agency

Classical Sociology Beyond Methodological Nationalism , 2014-04-17 Classical Sociology Beyond Methodological Nationalism defends classical sociology from the accusation of methodological nationalism To reject such accusation the volume presents three arguments The first contends that classical sociology has not failed to deal with the global world Part I The second that classical sociology has more frequently dealt with the transnational category of the social

rather than with the national Part II The third that where classical sociology has analysed national society the latter has never been envisaged as a rigidly confined entity within its political boundaries Part III The outcome is a re evaluation of classical sociological thought as a more functional tool for analysing the political forms of modernity in the era of globalisation Contributors include Vittorio Cotesta David Inglis Austin Harrington Massimo Pendenza Michael Schillmeier Emanuela Susca Dario Verderame and Federico Trocini Global Culture: Consciousness and Connectivity Roland Robertson, Didem Buhari-Gulmez, 2017-05-15 The current discourse of globalization is overwhelmingly centred upon the interconnectedness or connectivity of the contemporary world to the great neglect of the issues of global culture and global consciousness With contemporary worldwide culture increasingly characterized by such themes as astronomy cosmology space travel and exploration there is an increasing disjuncture between academic concern with connectivity on the one hand and culture and consciousness of the place of planet earth in the cosmos as a whole on the other This book addresses this deficiency from a variety of closely related perspectives presenting studies of religion science sport international organizations global resistance movements and migrations and developments in East Asia It brings together the latest theoretical empirical work from scholars in the US UK Australia Japan China and Israel on the significance of culture and global consciousness As such *Global Culture Consciousness and Connectivity* will be of great interest to scholars across and beyond the social sciences working in the areas of global studies cultural studies social theory the sociology of religion and related issues *Stability and the Lebanese State in the 20th Century* Tarek Abou Jaoude, 2022-08-25 Explaining state building failures in Lebanon during the 20th century this book looks at the relationship between legitimacy and stability in the country since the creation of the state in 1920 The presence of legitimacy is considered necessary to any successful state building endeavour This book argues that the Lebanese state failed to achieve any meaningful form of legitimacy from its inception in 1920 to its near collapse during the civil war However by analysing different eras of Lebanese history throughout the different presidential terms the author challenges the general understanding of stability and governance to show that the absence of legitimacy and society support actually contributed to the persistence of the Lebanese state More than this the evidence shows that Lebanese state was at its most stable when it was regarded as illegitimate The wider implicit question thus asked in the book revolves around a case where illegitimacy within the state is what ensures its stability and survival Based on primary sources including national archives and collections institutional documents personal memoirs newspapers and journals this book provides a rich survey on the development and functioning of Lebanese political institutions Nationalism and Communism in Eastern Europe and the Soviet Union W. Kemp, 1999-02-08 Nationalism and Communism in Eastern Europe and the Soviet Union looks at communism s attempts to come to terms with nationalism between Marx and Yeltsin how the inability of communist theorists and practitioners to achieve an effective synthesis between nationalism and communism contributed to communism s collapse and what lessons that holds for contemporary

Europe **Ethnic Stratification and Economic Inequality around the World** Max Haller in collaboration, Anja Eder, 2016-03-03 The modern world is characterised by pervasive economic inequalities Strong economic growth in some developing countries has contributed to a degree to a reduction in the levels of inequality between nations yet inequality within nations remains high and in some cases continues to increase Ethnic Stratification and Economic Inequality around the World investigates the reasons for these striking differences exploring the coincidence and interaction between economic stratification and ethnic differentiation Drawing on extensive international survey and statistical data the author develops a new theory and concrete hypotheses concerning the conditions which lead toward extreme inequality and those which tend toward greater equality A systematic examination of the interaction between class structures social stratification and ethnic differentiation this book sheds light on the manner in which the resulting social structures produce different levels of economic inequality offering a fivefold typology of patterns of ethnic stratification which can be applied to present day world regions Drawing on the work of Max Weber to provide a rigorous investigation of inequality around the world it demonstrates what sociology as a science of social reality can significantly contribute to our understanding of global economic stratification The book is relevant for a wide social scientific audience particularly for sociologists economists and political scientists working in a comparative perspective
