**National Parks for a New Generation** ,1985\* *National Parks for a New Generation* Conservation Foundation,1985  
**Conference on Science in the National Parks** ,1987 **National Park System** United States. Congress. Senate.  
Committee on Energy and Natural Resources. Subcommittee on Public Lands, Reserved Water, and Resource  
Conservation,1985 Pilgrimage to the National Parks Lynn Ross-Bryant,2013 National Parks America s Best Idea were  
from the first seen as sacred sites embodying the God given specialness of American people and American land and from the  
first they were also marked as tourist attractions The inherent tensions between these two realities ensured the parks would  
be stages where the country s conflicting values would be performed and contested As pilgrimage sites embody the values  
and beliefs of those who are drawn to them so Americans could travel to these sacred places to honor experience and be  
restored by the powers that had created the American land and the American enterprise This book explores the importance  
of the discourse of nature in American culture arguing that the attributes and symbolic power that had first been associated  
with the new world and then the frontier were embodied in the National Parks Author Ross Bryant focuses on National Parks  
as pilgrimage sites around which a discourse of nature developed and argues the centrality of religion in understanding the  
dynamics of both the language and the ritual manifestations related to National Parks Beyond the specific contribution to a  
richer analysis of the National Parks and their role in understanding nature and religion in the U S this volume contributes to  
the emerging field of religion and the environment larger issues in the study of religion e g cultural events and the spatial  
element in meaning making and the study of non institutional religion **Environmental Quality** ,1986 Park Science  
,1981 *Science and the National Parks* National Research Council,Division on Earth and Life Studies,Commission on  
Geosciences, Environment and Resources,Committee on Improving the Science and Technology Programs of the National  
Park Service,1992-02-01 The U S National Park Service needs much better scientific information to protect the nation s parks  
for future generations and research must be an essential element in its mandate Science and the National Parks examines  
the reasons why science is important to the national parks reviews previous evaluations of research in the parks and  
recommends ways to improve the current science program The book stresses the need for two distinct but related  
approaches to research called science for the parks and parks for science Science for the parks includes research to gain  
understanding of park resources and develop effective management strategies The parks for science concept recognizes that  
the national parks are potentially very important to scientific investigations of broad national and global environmental  
problems and invaluable for understanding the ecological response to anthropogenic change Science and the National Parks  
is a critical assessment of the problems hampering the current Park Service science program providing strong  
recommendations to help the agency establish a true mandate for science create separate funding and autonomy for the  
program and enhance its credibility and quality *General Technical Report PNW-GTR* ,2002 **Two Watershed Projects**
