Petersen Anders Sandberg Matthias Scheutz Litska Strikwerda Nicole Wyatt **The ^AParadox of Generosity** Christian Smith, Hilary Davidson, 2014-08-01 In *The Paradox of Generosity* Christian Smith and Hilary Davidson offer vital insight into how American adults conceive of and demonstrate generosity Focusing not only on financial giving but on the many diverse forms philanthropy can take they show the impact both positive and negative that giving has on individuals **The Moral System of Dante's Inferno** William Henry Vincent Reade, 1909 **Hello, My Name is Adrian** Ian John, 2000-07-20 What if we got it right from the very beginning What if humans in Paradise set out to write and live a mythology that encouraged them to access their fully developed selves instead of insisting that they be repulsed and terrorized by their potential Then we would not have the story of Adam Eve We would have the story of Jensy Matti and John Leupold a couple of prototypical humans for this dawning Age of Paradox living in the post identity Adrianic humanity *Paradoxes of Emotion and Fiction* Robert J. Yanal, 2015-07-08 How can we experience real emotions when viewing a movie or reading a novel or watching a play when we know the characters whose actions have this effect on us do not exist This is a conundrum that has puzzled philosophers for a long time and in this book Robert Yanal both canvasses previously proposed solutions to it and offers one of his own First formulated by Samuel Johnson the paradox received its most famous answer from Samuel Taylor Coleridge who advised his readers to engage in a willing suspension of disbelief More recently philosophers have argued that we are irrational in emoting toward fiction or that we do not emote toward fiction but rather toward factual counterparts or that we do not have real but only quasi emotion toward fiction generated by our playing games of make believe All of these proposed solutions are critically reviewed Finding these answers unsatisfactory Yanal offers an alternative providing a new version of what has been dubbed thought theory On this theory mere thoughts not believed true are seen as the functional equivalent of belief at least insofar as stimulating emotion is concerned The emoter's disbelief in the actuality of components of the thoughts must be rendered relatively inactive Such emotion is real and typically has the character of being richly generated yet unconsummated The book extends this theory also to resolving other paradoxes arising from emotional response to fiction how we feel suspense over what comes next in a story even when we are re reading it for a second or third time and how we take pleasure in narratives such as tragedy that excite unpleasant emotions such as fear pity or horror *Moral Psychology* Walter Sinnott-Armstrong, 2008 Since the 1990s many philosophers have drawn on recent advances in cognitive psychology brain science and evolutionary psychology to inform their work These three volumes bring together some of the most innovative work by both philosophers and psychologists in this emerging collaborative field **The Paradox of Love** Pascal Bruckner, 2012-02-13 A provocative reflection on the dilemmas of modern love The sexual revolution is justly celebrated for the freedoms it brought birth control the decriminalization of abortion the liberalization of divorce greater equality between the sexes women's massive entry into the workforce and more tolerance of homosexuality But as Pascal Bruckner one of France's leading writers argues in this lively and provocative reflection on the contradictions of modern love

our new freedoms have also brought new burdens and rules without however wiping out the old rules emotions desires and arrangements the couple marriage jealousy the demand for fidelity the war between constancy and inconstancy It is no wonder that love sex and relationships today are so confusing so difficult and so paradoxical Drawing on history politics psychology literature pop culture and current events this book a best seller in France exposes and dissects these paradoxes With his customary brilliance and wit Bruckner traces the roots of sexual liberation back to the Enlightenment in order to explain love s supreme paradox epitomized by the 1960s oxymoron of free love the tension between freedom which separates and love which attaches Ashamed that our sex lives fail to live up to such liberated ideals we have traded neuroses of repression for neuroses of inadequacy and we overcompensate Our parents lied about their morality Bruckner writes but we lie about our immorality Mixing irony and optimism Bruckner argues that when it comes to love we should side neither with the revolutionaries nor the reactionaries Rather taking love and ourselves as we are we should realize that love makes no progress and that its messiness surprises and paradoxes are not merely the sources of its pain but also of its pleasure and glory

The City Is More Than Human Frederick L. Brown, 2016-10-03 Winner of the 2017 Virginia Marie Folkins Award Association of King County Historical Organizations AKCHO Winner of the 2017 Hal K Rothman Book Prize Western History Association Seattle would not exist without animals Animals have played a vital role in shaping the city from its founding amid existing indigenous towns in the mid nineteenth century to the livestock friendly town of the late nineteenth century to the pet friendly livestock averse modern city When newcomers first arrived in the 1850s they hastened to assemble the familiar cohort of cattle horses pigs chickens and other animals that defined European agriculture This in turn contributed to the dispossession of the Native residents of the area However just as various animals were used to create a Euro American city the elimination of these same animals from Seattle was key to the creation of the new middle class neighborhoods of the twentieth century As dogs and cats came to symbolize home and family Seattleites relationship with livestock became distant and exploitative demonstrating the deep social contradictions that characterize the modern American metropolis Throughout Seattle s history people have sorted animals into categories and into places as a way of asserting power over animals other people and property In *The City Is More Than Human* Frederick Brown explores the dynamic troubled relationship humans have with animals In so doing he challenges us to acknowledge the role of animals of all sorts in the making and remaking of cities

Anthropology as Ethics T. M. S. Evens, 2009 Anthropology as Ethics is concerned with rethinking anthropology by rethinking the nature of reality It develops the ontological implications of a defining thesis of the Manchester School that all social orders exhibit basically conflicting underlying principles Drawing especially on Continental social thought including Wittgenstein Merleau Ponty Levinas Dumont Bourdieu and others and on pre modern sources such as the Hebrew bible the Nuer the Dinka and the Azande the book mounts a radical study of the ontology of self and other in relation to dualism and nondualism It demonstrates how the self other dichotomy disguises fundamental ambiguity or nondualism thus obscuring the essentially ethical dilemmatic and sacrificial nature of all social life It also proposes a reason other than dualist nihilist and instrumental one in which logic is seen as both inimical to and continuous with value Without embracing absolutism the book makes ambiguity and paradox the foundation of an ethical response to the pervasive anti foundationalism of much postmodern thought
