Robinson for the Defence . Robinson,Larry Robinson,Chrys Goyens,1989 **Robinson for the Defence** Larry Robinson,Chrys Goyens,1988 Predestination in Early Modern Reformed Theology Richard A. Muller,2024-04-24 Dr Richard A Muller investigates the complexity and development of predestination in Reformed thought in the sixteenth and seventeenth centuries *The Development of British Defence Policy* David Brown,2010 This work explores developing trends and underlying assumptions of British Defence Policy placing policy developments post 11 September in a wider context and assessing the impact of key personalities and events on a range of issues It provides a relevant and up to date assessment of this vital policy area **Zeppelin vs British Home Defence 1915-18** Jon Guttman,2018-03-09 When Ferdinand Graf von Zeppelin s rigid airship LZ 1 flew over Lake Constance in 1900 it was the most advanced and impressive flying machine in the world a colossal lighter than air craft capable of controlled flight In World War I Zeppelins were first used in a reconnaissance role but on 19 January 1915 Kaiser Wilhelm II authorised their use in bombing strategic targets in England From then on Zeppelin became synonymous with terror to the British and indeed the airship s effectiveness was more psychological than material Still their raids compelled the Royal Flying Corps and Royal Naval Air Service to embark on a program of modernising their aerial defences accelerating a process that would ultimately make the aeroplane rather than the airship the paramount flying machine of the war Using specially commissioned artwork contemporary photographs and first hand accounts this book tells the fascinating story of Britain s first Blitz from the airships who terrorised the public to the men who sought to defend the skies **John Robinson and the English Separatist Tradition** Timothy George,1982 This study was undertaken with the belief that a careful reading of Robinson s works would yield a more accurate assessment of his significance as a leading exponent of English Separatism **Routledge Handbook of Military Ethics** George Lucas,2015-05-22 The Routledge Handbook of Military Ethics is a comprehensive reference work that addresses concerns held in common by the military services of many nations It attempts to discern both moral dilemmas and clusters of moral principles held in common by all practitioners of this profession regardless of nation or culture Comprising essays by contributors drawn from the four service branches Army Navy Air Force and Marine corps as well as civilian academics specializing in this field this handbook discusses the relationship of ethics in the military setting to applied and professional ethics generally Leading scholars and senior military practitioners from countries including the US UK France China Australia and Japan discuss various national cultural views of the moral dimensions of military service With reference to the responsibilities of professional orientation and education as well as the challenges posed by recent technological developments this handbook examines the difficulties underpinning the fundamental framework of military service This book will be of much interest to students of military studies war theory ethics philosophy sociology war and conflict studies and security studies **Exceptions in International Law** Lorand Bartels,Federica Paddeu,2020-06-18 Many international

obligations are subject to exceptions These can be expressed in several ways an obligation may be vitiated by the presence of one of its constitutive negative requirements an obligation may be set aside by the application of another more specific rule or an actor might have a right to act in a certain way notwithstanding a contrary obligation Exceptions are also of fundamental practical importance for example they affect the allocation of the burden of proof This volume provides a systematic and analytic study of exceptions to legal obligations in international law and defences for breaches of these obligations It features contributions written by legal philosophers who introduce various theoretical approaches to the role of exceptions and scholars of international law who elaborate on generic issues applicable to exceptions in international law as well as examine specific issues arising from exceptions in their respective areas of expertise Topics covered include the use of force international criminal law human rights trade investment environment and jurisdictional immunities

The Development of British Defence Policy Mr David Brown, 2013-03-28 Britain's military forces have rarely been busier It is therefore crucial to understand the developing trends and underlying assumptions of British Defence Policy in regard to both foreign policy and international security This volume which covers both the Blair and Brown eras in defence policy making places developments post 11 September in a wider context assessing the impact of key personalities and events on a range of issues notably the perennial concern of military overstretch By critically appraising contemporary developments and examining the driving policy in specific cases this volume provides a relevant and up to date assessment of this vital policy area As well as being contemporary in its analysis the work is also comprehensive in scope embracing both policy objectives such as the expeditionary strategy and the desire to be a bridge between the US and EU and the instruments that underpin such policy

General Defences in Criminal Law Alan Reed,Michael Bohlander,2016-04-15 The law relating to general defences is one of the most important areas in the criminal law yet the current state of the law in the United Kingdom reveals significant problems in the adoption of a consistent approach to their doctrinal and theoretical underpinnings as exemplified by a number of recent developments in legislation and case law A coherent and joined up approach is still missing This volume provides an analysis of the main contentious areas in British law and proposes ways forward for reform The collection includes contributions from leading experts across various jurisdictions Part I examines the law in the United Kingdom with specialist contributions on Irish and Scottish law Part II consists of contributions by authors from a number of foreign jurisdictions all written to a common research grid for maximum comparability which provide a wider background of how other legal systems treat problems relating to general defences in the context of the criminal law and which may serve as points of reference for domestic law reform
