industry its business practices its market dynamics its technologies and its politics The book traces the complex transformation of the worlds of global sourcing from its origins in the new international division of labour in the 1970s through the rapid growth of back office economies in India and the Philippines since the 1990s to the development of nearshore markets in Latin America and Eastern Europe Recently this evolving process of geographical and organizational restructuring has included experiments in backshoring within low cost ex urban locations in the United States and a wave of software enabled automation which threatens to remove labour from many back offices altogether In these and other ways the offshore revolution continues
