Robots Eye Openers:

Classroom Robotics Kathleen P. King, Mark Gura, 2007-02-01 The purpose of this book is to reach out to teachers parents coaches and students who may be hoping to or just investigating the possibility of how to get started with robotics At the same time we hope to leverage the efforts of those who have been hard at work and play in this massive movement for many years applaud their efforts and provide them with documentation support and additional resources to reach further into the possibilities they can help create for all of us in bringing the power and potential of learning through robotics to more students to the classroom and beyond Not only does this book provide resources and firsthand insight into this exciting field but it also provides one of a kind perspectives of curricular applications of robotics for student learning

Computer-Human Interaction Research and Applications Hugo Plácido da Silva, Pietro Ciproso, 2025-03-07 This two volume set CCIS 2370 and CCIS 2371 constitutes the proceedings of the 8th International Conference on Computer Human Interaction Research and Applications CHIRA 2024 held Porto Portugal during November 21 22 2024 The 16 full papers and 45 short papers presented in these volumes were carefully reviewed and selected from 76 submissions These papers focus on the research advancements and practical applications within various areas in the field of Computer Human Interaction including Human Factors and Information Systems Interactive Devices Interaction Design and Adaptive and Intelligent Systems

Gods and Robots Adrienne Mayor, 2020-04-21 Traces the story of how ancient cultures envisioned artificial life automata self moving devices and human enhancements sharing insights into how the mythologies of the past related to and shaped ancient machine innovations

Wording Robotics Jean-Paul Laumond, Emmanuelle Danblon, Céline Pieters, 2019-07-01 Robots challenge humans beliefs and expectations Hence regardless of whether they are the audience of a conference the visitors of a lab the citizens in general some journalists or the European Parliament the first step in order to gain a better understanding of the field of robotics is obviously to consult the experts Roboticists seem indeed to be in the best position to guide society in this matter whether it is in the everyday life or within an official institution Today however there is a gap between the robots as they are actually thought and built and the intelligent and autonomous machines as they are perceived by the society How can we explain it Do the words borrowed from the living organisms and used to describe robots play a role in the confusion about the status of the discipline of robotics The texts gathered within this book focus on the problematic of wording robotics from various perspectives They are the result of a unique interdisciplinary meeting gathering roboticists linguists philosophers and neuroscientists the 4th Workshop of Anthropomorphic Motion Factory held at LAAS CNRS in Toulouse on Nov 31st Dec 1st 2017

Robotics and Rehabilitation Intelligence Jianhua Qian, Honghai Liu, Jiangtao Cao, Dalin Zhou, 2020-12-18 This 2 volume set constitutes the refereed proceedings of 1st International Conference on Robotics and Rehabilitation Intelligence ICRRI 2020 held in Fushun China in September 2020 The 56 full and 4 short papers were carefully reviewed and selected from 188 submissions The papers are divided into the following topical

sections In the first volume Rehabilitation robotics and safety machine vision application electric drive and power system fault diagnosis robust stability and stabilization intelligent method application intelligent control and perception smart remanufacturing and industrial intelligence and intelligent control of integrated energy system In the second volume smart healthcare and intelligent information processing human robot interaction multi robot systems and control robot design and control robotic vision and machine intelligence optimization method in monitoring advanced process control in petrochemical process and rehabilitation intelligence

Killer Robots Armin Krishnan, 2016-04-22 Military robots and other potentially autonomous robotic systems such as unmanned combat air vehicles UCAVs and unmanned ground vehicles UGVs could soon be introduced to the battlefield Look further into the future and we may see autonomous micro and nanorobots armed and deployed in swarms of thousands or even millions This growing automation of warfare may come to represent a major discontinuity in the history of warfare humans will first be removed from the battlefield and may one day even be largely excluded from the decision cycle in future high tech and high speed robotic warfare Although the current technological issues will no doubt be overcome the greatest obstacles to automated weapons on the battlefield are likely to be legal and ethical concerns Armin Krishnan explores the technological legal and ethical issues connected to combat robotics examining both the opportunities and limitations of autonomous weapons He also proposes solutions to the future regulation of military robotics through international law

Feedback Control of Dynamic Bipedal Robot Locomotion Eric R. Westervelt, Jessy W. Grizzle, Christine Chevallereau, Jun Ho Choi, Benjamin Morris, 2018-10-03 Bipedal locomotion is among the most difficult challenges in control engineering Most books treat the subject from a quasi static perspective overlooking the hybrid nature of bipedal mechanics *Feedback Control of Dynamic Bipedal Robot Locomotion* is the first book to present a comprehensive and mathematically sound treatment of feedback design for achieving stable agile and efficient locomotion in bipedal robots In this unique and groundbreaking treatise expert authors lead you systematically through every step of the process including Mathematical modeling of walking and running gaits in planar robots Analysis of periodic orbits in hybrid systems Design and analysis of feedback systems for achieving stable periodic motions Algorithms for synthesizing feedback controllers Detailed simulation examples Experimental implementations on two bipedal test beds The elegance of the authors approach is evident in the marriage of control theory and mechanics uniting control based presentation and mathematical custom with a mechanics based approach to the problem and computational rendering Concrete examples and numerous illustrations complement and clarify the mathematical discussion A supporting Web site offers links to videos of several experiments along with MATLAB code for several of the models This one of a kind book builds a solid understanding of the theoretical and practical aspects of truly dynamic locomotion in planar bipedal robots

Robot-Proof Joseph Aoun, 2017-08-25 How to educate the next generation of college students to invent to create and to discover filling needs that even the most sophisticated robot cannot Driverless cars are hitting the road powered by artificial intelligence Robots can

climb stairs open doors win Jeopardy analyze stocks work in factories find parking spaces advise oncologists In the past automation was considered a threat to low skilled labor Now many high skilled functions including interpreting medical images doing legal research and analyzing data are within the skill sets of machines How can higher education prepare students for their professional lives when professions themselves are disappearing In Robot Proof Northeastern University president Joseph Aoun proposes a way to educate the next generation of college students to invent to create and to discover to fill needs in society that even the most sophisticated artificial intelligence agent cannot A robot proof education Aoun argues is not concerned solely with topping up students minds with high octane facts Rather it calibrates them with a creative mindset and the mental elasticity to invent discover or create something valuable to society a scientific proof a hip hop recording a web comic a cure for cancer Aoun lays out the framework for a new discipline humanics which builds on our innate strengths and prepares students to compete in a labor market in which smart machines work alongside human professionals The new literacies of Aoun s humanics are data literacy technological literacy and human literacy Students will need data literacy to manage the flow of big data and technological literacy to know how their machines work but human literacy the humanities communication and design to function as a human being Life long learning opportunities will support their ability to adapt to change The only certainty about the future is change Higher education based on the new literacies of humanics can equip students for living and working through change

Robot-Assisted Radical Prostatectomy John W. Davis, 2016-09-07 This book addresses knowledge gaps in RARP in 3 key sections 1 Step by step approach including multiple technique options and innovations 2 Patient selection safety outcomes and 3 Preparing the patient for surgery The order is more based upon knowledge priority rather than a chronologic sequence in which part 3 would go first Part two allows more summary and commentary on evidence and part three allows some creative content that is otherwise hard to find in one place medical evaluations imaging clinical trials patient education etc This textbook emphasizes content for the advanced skills surgeon in that multiple techniques are presented as well as state of the art evidence The learning curve is addressed and the authors clarify how this text is useful for learners The caveat is that they should be careful in patient selection and stick with what their mentors are showing them With experience they can then branch out into the many techniques presented here Robot Assisted Radical Prostatectomy Beyond the Learning Curve will also have cross over appeal for surgical assistants physician assistants nurses and anyone else involved in the surgical care of prostate cancer
