Jeff Vandenengel, 2023-11-15 Winner of The Navy League s 2024 Alfred Thayer Mahan Award for Literary Achievement The nuclear powered aircraft carrier is naval history s most powerful and versatile warship It is the reason the U S Navy is the predominant force at sea today Throughout its illustrious history the carrier has overcome serious flaws including its expense vulnerability centralization of combat power and its airwing s short range The U S Navy always accepted those flaws because the carrier was the best means of delivering firepower Today s technologies however provide key opportunities for the U S Navy to move beyond the limitations of a carrier centric fleet by redesigning its force structure **Questioning the Carrier** examines how the U S Navy can embrace the Age of the Missile network the distributed fleet and diversify to develop a fleet that benefits from the aircraft carrier s many strengths without being wholly dependent on them By acting on those opportunities the U S Navy can develop a structure that performs the carrier centric fleet s functions more effectively using a force consisting of more platforms with less total risk and within the same long term budget As adversaries are improving their ability to deter the carrier thus causing its utility to wane the author examines the Navy s past successes to show how it can overcome institutional resistance to change and continue to rule the seas      **Pershing!** Donald Hawkins, 2021-05-12  
This book is one of honor and patriotism and is a true story This book tells of one man s many struggles manning three of the United States nuclear missiles The time period of this epic story takes place during the late 1970s and during the Cold War The struggle was caused by the many social pressures of the day The pressures also came from the lack of qualified personnel crewing those missiles The Cold War was won by the United States due in part to the mighty Pershing missile without firing a shot      Subject Guide to Children's Books In Print, 1996 R R Bowker Publishing, 1996      **Subject Guide to Children's Books In Print, 1990-1991** R R Bowker Publishing, 1990-09      *Labour's Ballistic Missile Defence Policy 1997-2010* James Simpkin, 2022-12-23 This book uses the strategic relational approach to explain how the Labour governments of Tony Blair and Gordon Brown integrated the United Kingdom into the US ballistic missile defence system in order to maintain national security and to uphold the special relationship while at the same time recognising that voters were in general opposed to missile defence Labour s Ballistic Missile Defence Policy 1997 2010 examines how the Labour administration was tasked with navigating a domestic political environment in which they had to appear tough on defence in general in order to appeal to a broader range of the electorate while recognising that voters were opposed to missile defence in particular This book seeks to answer the question of why the centre left government of Tony Blair and Gordon Brown elected on a mandate of multi lateralism in international relations and espousing an ethical dimension to foreign policy

committed the United Kingdom to US ballistic missile defence an internationally divisive military project associated with the US Republican Party and George W Bush in particular This book is essential for students and researchers interested in British military history international relations strategic studies British politics Labour politics and political theory

*Relations during the Post-Cold War Era* Joseph A Gagliano,2014-09-15 Conventional wisdom holds that the President enjoys the preponderance of foreign policy power however Congress has influenced China policymaking more than is generally recognized The legislature has demonstrated consistent interests in the realm of China policy and it has invariably pursued those interests through law making During the post Cold War period in particular the Sino U S relationship has evolved in a radically changing international environment marked by a power transition inherent in China s rise The development of official relations between Washington and Beijing during the Cold War occurred in the shadow of an assertive Soviet power when the United States and China were able to find common geopolitical ground in opposing Soviet expansion while overlooking longstanding political disagreements The dissolution of the Soviet empire however put the United States and China on a new geostrategic footing Political disagreements were no longer exempted in light of a counter Soviet strategy and the reduction in concern for the Soviet threat allowed policymakers in Washington to more aggressively pursue trade interests that conflicted with those of China Given this international context this book aims to discern how Congress reconciled competing Sino U S interests in a post Cold War era when external threats no longer dictated an apparent hierarchy that favored China over the Soviet Union This work will be of interest to students and scholars of US foreign policy China Studies and international relations in general **The Finding Guide to AIAA Meeting Papers** American Institute of Aeronautics and Astronautics.
