Rockets And Spaceflight:

Finding Out about Rockets and Spaceflight Lynn Myring, 1982 Describes modern spaceflight with speculations about interplanetary travel SpaceX Erik Seedhouse, 2013-06-15 This first account of commercial spaceflight's most successful venture describes the extraordinary feats of engineering and human achievement that have placed SpaceX at the forefront of the launch industry and made it the most likely candidate for transporting humans to Mars Since its inception in 2002 SpaceX has sought to change the space launch paradigm by developing a family of launch vehicles that will ultimately reduce the cost and increase the reliability of space access tenfold Coupled with the newly emerging market for governmental private and commercial space transport this new model will re-ignite humanity's efforts to explore and develop space Formed in 2002 by Elon Musk the founder of PayPal and the Zip2 Corporation SpaceX has already developed two state-of-the-art new launch vehicles established an impressive launch manifest and been awarded COTS funding by NASA to demonstrate delivery and return of cargo to the ISS This book describes how simplicity low cost and reliability can go hand in hand as promoted in the philosophy of SpaceX It explains how by eliminating the traditional layers of internal management and external sub-contractors and keeping the vast majority of manufacturing in-house SpaceX reduces its costs while accelerating decision making and delivery controls quality and ensures constant liaison between the design and manufacturing teams

Rockets and Revolution Michael G. Smith, 2014-12-01 **Rockets and Revolution** offers a multifaceted study of the race toward space in the first half of the twentieth century examining how the Russian European and American pioneers competed against one another in the early years to acquire the fundamentals of rocket science engineer simple rockets and ultimately prepare the path for human spaceflight Between 1903 and 1953 Russia matured in radical and dramatic ways as the tensions and expectations of the Russian revolution drew it both westward and spaceward European and American industrial capacities became the models to imitate and to surpass The burden was always on Soviet Russia to catch up enough to achieve a number of remarkable firsts in these years from the first national rocket society to the first comprehensive surveys of spaceflight Russia rose to the challenges of its Western rivals time and again transcending the arenas of science and technology and adapting rocket science to popular culture science fiction political ideology and military programs While that race seemed well on its way to achieving the goal of space travel and exploring life on other planets during the second half of the twentieth century these scientific advances turned back on humankind with the development of the intercontinental ballistic missile and the coming of the Cold War Purchase the audio edition
