Howgego,2025-02-06 Want to join the ultimate cosmic treasure hunt They fall from the sky and tell us about the universe a passionate story of the excitement and the science of searching for and deciphering meteorites Carlo Rovelli Meteors with their ethereal glowing trails slashing through the atmosphere have entranced us for centuries But these extraterrestrial visitors are also inestimably valuable Not just for collectors who can make their fortunes tracking them down but for scientists too Meteorites are the most ancient objects we know unblemished time capsules from the birth of the solar system Following in the footsteps of passionate hobbyists ground breaking scientists and intrepid adventurers Joshua Howgego takes a rollicking ride through the world of meteorite hunting Join the seasoned practitioners braving the elements as they scour the Sahara and ice sheets of Antarctica Discover how closer to home one unlikely hero a self taught jazz guitarist is uncovering the countless micrometeorites scattered across the rooftops of our cities And meet the professor searching for the rarest of the rare fossil meteorites entombed in rock since the days of the dinosaurs Finding these stones from space is just the beginning As scientists tease out their secrets they piece together an unexpected new history of the solar system with implications that extend to one of the most fundamental questions we can ask how did life on earth begin A

Professor, A President, and A Meteor Cathryn J. Prince,2010-12-14 When a fiery meteor crash in 1807 lit up the dark early morning sky in Weston Connecticut it did more than startle the few farmers in the sleepy village More importantly it sparked the curiosity of Benjamin Silliman a young chemistry professor at nearby Yale College His rigorous investigation of the incident started a chain of events that eventually brought the once low standing of American science to sudden international prominence And by coincidence the event also embroiled Silliman in politics pitting him against no less an adversary than President Thomas Jefferson Based on a wealth of original source documents and interviews with current experts in history astronomy and geology this journalist tells the remarkable story of Benjamin Silliman arguably America s first bonafide scientist In a lively narrative rich with fascinating historical detail the author documents the primitive state of American

science at the time Silliman's careful analysis of the meteor samples and the publication of his conclusions which contradicted both popular superstitions regarding meteors as ominous portents and a common belief that meteors come from volcanic eruptions on the moon She also describes Silliman's struggles to build a chemistry department at Yale with rudimentary material new insights into geology that resulted from his analysis of the meteor and his report to the prestigious French Academy which raised the prestige of American science Finally she discusses the political turbulence of the time which Silliman could not escape and how the meteor event was used to drive a wedge between New England and Jefferson This is a fascinating vignette of Federal Period America when science on this continent was still in its infancy but was just beginning to make its mark
