Essential Immunology Ivan Maurice Roitt, 1979 **Essential Immunology** I. M. Roitt, 1977-09 *Grossman's Endodontic Practice* V. Gopikrishna, 2021 [The Epididymis: From Molecules to Clinical Practice](#) Bernard Robaire, Barry Hinton, 2012-12-06. Since the late 1960s there has been an acceleration of research focused on understanding how the efferent ducts, the epididymis, and the vas deferens function with respect to the maturation and storage of spermatozoa and as hormone dependent tissues. Another major interest in the epididymis is that it is an attractive target for the development of male contraceptives. There are well over 16 000 peer reviewed articles in the literature on these tissues, their structure, gene expression, protein synthesis, and function. Regular international meetings have been initiated that are dedicated to this field. Thus there is an urgent need for a comprehensive reference volume that spans every facet of epididymal biology, from historical background to the most current results from basic cell and molecular biology to clinical issues. Well established experts from every part of the world have contributed to this volume. By necessity, each author was given page limitations so that many topics are not dealt with exhaustively. Whenever possible, references to more comprehensive discussion of specific topics are included.

Grossman's Endodontic Practice Suresh Chandra, 2014-01-01. It incorporates the changes that have occurred in endodontic theory and practice in terms of materials, concepts, and protocols. The presentation of the concepts and techniques has also been revised.

Abstracts of microbiology and hygiene ,1978 **Diagnostic Hematology** Norman Beck,2008-12-19 The approach described in this book is different from that in most student texts and has been very successful in practice starting almost from scratch but omitting many of the basics such as the details of hematopoiesis laboratory technology and so on which are hardly relevant to the practising clinician and student in the wards and are primarily of interest to the hematologist and sometimes to the clinical specialist Considerable emphasis is given to the clinical history and examination and the interpretation of the clinical patterns thus exposed Hopefully it will overcome many of the traditional problems experienced in practical diagnostic haematology
