Hall, 2011-10-18 In this work the authors offer a unified transdisciplinary approach for achieving sustainable development in industrialized nations They present an insightful analysis of the ways in which industrial states are unsustainable and how economic and social welfare are related to the environment public health and safety

Corporate Social Responsibility, Entrepreneurship, and Innovation Kenneth Amaeshi, Paul Nnodim, Onyeka Osuji, 2013 Despite its recent popularity in literature theory and practice Corporate Social Responsibility CSR remains a vague concept that struggles to define itself beyond the confines of corporate philanthropy or sustainability In some circles it is a response to the present and anticipated climate change challenges while in others it focuses on fair trade corporate governance and responsible investment What then is CSR and how do we understand its purpose In Corporate Social Responsibility Entrepreneurship and Innovation authors Kenneth Amaeshi and Paul Nnodim consider the governance of corporate externalities positive and negative impacts of firms on society and the environment as the main thrust of the CSR discourse a field that hitherto only the state has regulated with sometimes coercive actions This book contributes to the theorization of CSR by presenting the meaning of

CSR in a clear and distinct manner giving the ongoing CSR debate a new direction anchored on a firm economic philosophy. It reinforces the view of firms as social institutions as well as economic actors establishing CSR as a form of justice rather than philanthropy. Articulating CSR as private governance of corporate externalities for the first time, this book provides researchers with a new paradigm to translate knowledge into action and offers reflective managers an alternative framework in which to explore their corporate strategies and decisions.

A Prism on Globalization Subramanian Rangan, Robert Z. Lawrence, 2011-10-01. The unprecedented shifts in the U.S. dollar's exchange rate that started during the late 1970s and continued through the 1980s provide an ideal opportunity to explore how the global economy works and the role that multinational enterprises (MNEs) play in the phenomenon of globalization. In this book, Subramanian Rangan and Robert Z. Lawrence examine the international pricing, sourcing, and trade responses of MNEs to shifts in the dollar. Based upon the micro patterns they observe in MNE behavior, the authors suggest explanations for some puzzling macro patterns evident in our international economy. They conclude that the global integration of markets remains incomplete due to informational and other important discontinuities, and they refute stereotypes which portray multinational firms as either footloose or inflexible. Policy implications for exchange rates, trade, and foreign direct investment are also discussed.

The Multinational Enterprise in Developing Countries Rick Molz, Catalin Ratiu, Ali Taleb, 2013-06-25. A key distinctive feature of Multinational Enterprises (MNEs) as organizations resides in the fact that they span across borders. This exposes them to dissimilar and often unfamiliar social and economic conditions as they venture in foreign countries. MNEs from industrialized economies that are active in developing countries and emerging markets face particularly challenging hurdles due to both economic and institutional discrepancies between their home and host countries. This book focuses on the uneasy interaction between the traditional logics of developing countries and the economic logic of MNEs. The traditional logics of most developing countries are built around community-based legitimacy and an intuitive but concrete epistemology. Conversely, the economic logic of MNEs from developed economies is built around technical and economic legitimacy and an abstract intellectual epistemology. Unpacking the uneasy interactions between these two logics will help achieve MNEs' objectives of competitiveness in developing countries as well as globally.

The Montreal Local Global Research Group is a well-recognized research group in formulating and researching local and global issues in strategic management from the perspective of integrating divergent dominant logics into the strategy conceptualization process, and this will be the first book to be dedicated to the study of the interaction between the traditional logic of developing country and the economic logic of Multinational Enterprise (MNE). The cultural diversity of the contributing authors and the multidisciplinary approach offers a fresh perspective from which to explore beneficial corporate and local strategies that promote long-term economic growth consistent with local traditional and cultural norms. This collection will be primarily of interest to scholars of international business, international development, and economics. Furthermore, this book is immediately relevant to decision makers in

Business History and International Business Peter Buckley, 2014-01-02 Business History and International Business are cognate subjects There are few if any studies of international business that do not require a proper study of context International business decision making must be made relevant by a considered evaluation of the circumstances surrounding that decision This often means putting it into its historical context The contributions that the study of international business can make to business history are the input of appropriate theory and appropriate research methods The best international business theory can illuminate the seemingly disparate strategies of firms in given historical circumstances and can provide an integrated overarching conceptual structure of the study of business history The research methods used in international business are also worthy of scrutiny by business historians The proposition of this book is that international business theory and method can complement business history This cross fertilization has been occurring with increasing regularity over the past few decades and this book brings together some of the fruits of this conjunction of two important intellectual domains
