Embodied Being Jeffrey Maitland,2016-02-09 Embodied Being is unique among books on manual therapy offering an infrastructure for intuition a philosophical approach to what is essentially a practical process of diagnosis and treatment with

one's hands Grounded in the author's decades of practice as a Rolfer and Zen meditator the book offers a first of its kind three step method for training practitioners how to see holistically given the enormously important role perception plays in assessing clients By exposing many of the unconscious philosophical assumptions that occlude our understanding the depths of manual therapy Embodied Being promises to illuminate the full scope of body mind healing from the point of view of both the practitioner and the person receiving the work Embodied Being states the principles of intervention and shows practitioners how to use them to answer three fundamental questions common to all forms of therapy What do I do first What do I do next and When am I finished Perplexed that most practitioners are unable to answer these questions and simply rely on their intuition Maitland sets out to define what makes a truly life altering bodywork session drawing on his understanding of Goethe Merleau Ponty and other great thinkers Maitland proposes that the holistic approach in bodywork is capable of creating new possibilities for the future by erasing the patterns that bind us to a dysfunctional past Such sessions can so profoundly reshape the body that there is no longer any room for emotional torment thus manual therapy can free bodies of physical pain releasing the innate joy within the core of all human beings Ultimately giving and receiving manual therapy teaches both practitioners and clients how to move with grace open their hearts and touch the numinous *The Book of Highs* Edward Rosenfeld,2018-04-17 Blow your mind with this catalog of drug free techniques from the mystical to the mechanical and from the ancient to the state of the art An encyclopedia for the curious and courageous The Book of Highs catalogs the hundreds of ways humans can alter consciousness minus drugs and alcohol Drawn from cultures around the world as well as from neurological research here are positive techniques Self Hypnosis Alterations of Breathing Fervent Prayer Spinning And here are negative techniques Self Flagellation Sleep Deprivation Fire Walking Methods derived from religious and mystic traditions Transcendental Meditation Tea Ceremony Tantric Sex Methods that use devices from the domestic Metronome Watching to the state of the art Brain Wave Biofeedback Electrodermal Activity EDA Ganzfeld Effect and Psychedelic Bathtub Whether you're looking for a life changing adventure like Skydiving something to do every day just to change things up like Zen Morning Laugh or just some enlightenment about the lengths people have gone to in order to experience something new The Book of Highs will get you there *Movement* Robert Barton,Barbara Sellers-Young,2017-09-19 Movement Onstage and Off is the complete guide for actors to the most effective techniques for developing a fully expressive body It is a comprehensive compilation of established fundamentals a handbook for movement centered personal growth and a guide to helping actors and teachers make informed decisions for advanced study This book includes fundamental healing conditioning processes essential techniques required for versatile performance specialized skills various training approaches and ways to frame the actor's movement training Using imitation exercises to sharpen awareness accessible language and adaptable material for solo and group work the authors aim to empower actors of all levels to unleash their extraordinary potential Spinal Manipulation Made Simple Jeffrey Maitland,2012-10-30 Written by

an expert on alternative bodywork this book presents techniques for manipulating the soft tissues of the back in a safe simple manner The method avoids the high velocity low amplitude thrusting techniques employed by chiropractors Instead it utilizes the intuitive sense of somatic bodyworkers combined with the proven theory and technique of Rolfing to provide safe and effective treatment Maitland shows how to elegantly release joint fixations in the spine sacrum pelvis and ribcage by using subtle soft tissue techniques rather than the thrusting techniques that pop the joints This gentler kind of individualized Rolfing work is thoroughly described within an explanation of biomechanics aided by drawings and photographs which depict techniques and anatomy Breathing, Movement, Exploration Barbara Sellers-Young, 2001-09 Applause Books Breathing Movement Exploration is a groundbreaking approach to how to use your body Barbara Sellers Young combines body mechanics and eastern and western philosophy to create a new visceral awareness of the performance process Its simple step by step structure enables the reader to learn the concepts of Laban and Stanislavski while exploring eastern ideas of breath and energy Breathing Movement Exploration is a useful blueprint for how to use your body on stage It speaks to professionals as well as anyone fascinated by the inner process of an actor s training or to gain cognitive and physical insight into one s own self *Integrative Therapies in Rehabilitation* Carol M. Davis, 2024-06-01 For more than 20 years Integrative Therapies in Rehabilitation continues to be a most researched resource on complementary and alternative therapies in rehabilitation This renowned text now in its Fourth Edition relates the updated scientific evidence and the clinical efficacy of integrating what have now become well known complementary and alternative therapies in rehabilitation to successfully improve patient outcomes This text has been developed to accompany university courses in complementary and alternative therapies as a reference manual for clinical practices and as a resource for those interested in the science behind holistic therapies Holistic therapies are those therapies not commonly found in allopathic medicine that are intended to stimulate a therapeutic response from both the body neuromusculoskeletal and cardiopulmonary systems and the mind Integrative Therapies in Rehabilitation Fourth Edition by Dr Carol M Davis is particularly designed for those health professionals who want to understand the scientific foundation and peer reviewed research supporting complementary and alternative therapies The Fourth Edition is divided into two parts The beginning chapters describe the latest cellular biology science and explain the theories put forth on the overall mechanisms of action of the effect of these various therapies on the soft tissue fascia and nervous systems The first part also chronicles the advancement of scientific research in the various therapies since the 1980 s to explain in cellular physiology terms the outcomes observed by using a number of holistic therapies The second part presents various therapies commonly integrated with allopathic therapies in rehabilitation body work therapies mind body therapies and energy work therapies The text describes each therapy with a history cellular mechanism of action and an up dated reference section of the evidence of efficacy for the therapy as reported in the literature often concluding with a case example Integrative Therapies in Rehabilitation Fourth Edition will be the go to resource for health professionals

to understand the scientific evidence and efficacy of complementary and alternative therapies for rehabilitation and improving patient outcomes **PainFree 1-2-3 ! A Proven Method to Get You Pain Free Now** Jacob Teitelbaum,2005
