Rolling On:

Rolling On Jamie Sumner, 2025-10-07 In this equal parts heartbreaking and heartwarming Kirkus Reviews companion to Jamie Sumner's acclaimed and beloved novels *Roll with It* and *Time to Roll* Ellie finds herself faced with first love and learning to let go. It's the very end of eighth grade and all everyone can talk about is high school everyone except Ellie Cowan. Ellie wants to freeze time. Middle school was epic. She moved to Oklahoma, made her best friends win a baking championship, quit a beauty pageant and dominated Putt Putt golf in her wheelchair. But now her feelings for her best friend Bert are starting to change. When did Bert get so cute? And why are all the other girls suddenly noticing too? As if that isn't enough to deal with, Grandpa's health takes a turn for the worse. So what do you do when you don't know how to hold on or when to let go?

Big Wheels Rolling On Paul W. J. O'Brien, 2021-05-27 *Big Wheels Rolling On* portrays many events that transpired over several decades in the author's life, the majority as an adult. From funny things that happened to dangerous life-threatening situations, the short stories contained in these pages center around real-life interactions with key players that were a part of Paul's life. A canoe trip that went south to a near-death experience while trucking. While flying a near miss with a flock of geese to loneliness and fear in a serious blizzard to fighting a forest fire. It's all here. Yet throughout his life, there is an abiding sense of happiness. Life has been good to Paul, and it shows up in spades. You will enjoy his sense of humor yet feel the depth of the challenges that faced him, which could be and often were just around the next corner.

Rolling on the River Steve Neal, 1999 In these pages you'll meet the state legislator who never met a special interest he did not like, an alderman groveling to a mob boss, and the prosecutor who gained notoriety as a publicity hound. BOOK JACKET Neal's beat is politics, but his interests are rich and varied. He also writes about sports, music, literature, and film with a point of view that is fresh and original. BOOK JACKET

Fields of Wheat, Rolling on Forever Lisa Walsh, 2014-11-26 Family didn't seem to be important when I was a child. It was something we took for granted. When children played, there would be two parents watching, throwing a ball around and joking or sitting around the picnic table. Well, when I was a little child toddling around, what I remember most is my time with my family in Florida: my mom, my dad, my sister Chris, and my brother Mike. Family to me at that time meant having both parents around. I believe one of our favorite places to go was Clearwater, Florida. My Aunt Fran and Uncle Al lived on an outlet of Clearwater Bay, a few blocks away from the Gulf of Mexico. My dad would often take us fishing off my uncle's dock. Uncle Al had a boat that we would ride around in as well, and he would let us drive it, but under adult supervision, of course. Mom and Aunt Fran would stay back and either clean the fish that we caught, a dirty job nobody wanted, or just watch us having fun. Mom always liked being outdoors near the water. Along with boating and fishing, we loved looking at the barnacles that attached to the walls around the bay area and around the posts holding up the dock. Mom seemed to be the one most fascinated with these small and disfigured little creatures. She and the rest of us seemed to enjoy watching these creatures just to pass the time of day.

Rolling On: A Roller Derby League Survival Guide, *Rolling On* Gerald W. Hankins, 2003-12-13

Gary McPherson contracted life threatening polio during the epidemic of 1955 which left him a quadriplegic. He retains just enough coarse movement in his left hand to click a mouse and enough strength in his left leg to push his wheelchair backwards a few feet. Gary cannot feed himself or comb his hair. Yet his achievements are amazing. He is a husband and father, has coached championship sporting teams, is past chairman of the Premier's Council for the Status of People with Disabilities and is currently both a lecturer in the School of Business at the University of Alberta and executive director of the Canadian Centre for Social Entrepreneurship. Foreword by Dr Robert D Steadward and Garry D Wheeler

Primer on Flat Rolling John G. Lenard, 2013-12-04

Primer on Flat Rolling is a fully revised second edition and the outcome of over three decades of involvement with the rolling process. It is based on the author's yearly set of lectures delivered to engineers and technologists working in the rolling metal industry. The essential and basic ideas involved in designing and analysis of the rolling process are presented. The book discusses and illustrates in detail the three components of flat rolling: the mill, the rolled metal, and their interface. New processes are also covered: flexible rolling and accumulative roll bonding. The last chapter contains problems with solutions that illustrate the complexities of flat rolling. New chapters include a study of hot rolling of aluminum contributed by Prof M Wells, advanced applications of the finite element method by Dr Yuli Liu and by Dr G Kraljics, roll design by Dr J B Tiley, and the history of the development of hot rolling mills written by Mr D R Adair and E B Intong. Engineers, technologists, and students can all use this book to aid their planning and analysis of flat rolling processes. Provides clear descriptions for engineers and technologists working in steel mills. Evaluates the predictive capabilities of mathematical models. Assignments and their solutions are included within the text.

Wind-tunnel Investigation of Effect of Sweep on Rolling Derivatives at Angles of Attack Up to 13° and at High Subsonic Mach Numbers, Including a Semiempirical Method of Estimating the Rolling Derivatives James W. Wiggins, 1954

An investigation was performed in the Langley high speed 7 by 10 foot tunnel in order to determine the rolling derivatives for swept wing body configurations at angles of attack from 0 degrees to 13 degrees and at high subsonic Mach numbers. The wings had sweep angles of 3.6 degrees, 32.6 degrees, 45 degrees, and 60 degrees at the quarter chord line, an aspect ratio of 4, a taper ratio of 0.6, and an NACA 65A006 airfoil section parallel to the free stream. The results indicate a reduction in the damping in roll derivative at the higher test angles of attack. Of the wings tested, instability of the damping in roll derivative was experienced over the

Leland, 1960 **Analysis of Effects of Interceptor Roll Performance and Maneuverability on Success of Collision-course Attack** William H.
